**High Valley.**

High gate on Saturday; so high that it almost blew the High valley No. 1 scribe over the peak.

The No. 1 scribe is cutting prop timber in Rupp hollow for John Stoner; he expects to get four car loads before commencing to haul; he is still a good prop man—where he can't get timber, it's no use for any one else to try.

The forenoon farmers are through with out land plowing; Dr. Barker has already sowed his oats; the Dr. is always ahead.

The No. 1 scribe said it is not right to sell all the land to the state on account of the poor people for to pasture; if this keeps on after a few years no one will have any young cattle to sell, and that is what keeps hay so high, as the farmers used to drive their young cattle in the mountain in place of having them in the field and then they could sell hay; but now they must pasture it and lots of pasture that is in the mountain will do no one any damage if the cattle would run on it; I think all those who have mountain land should hold it and not sell it merely for a song.

Barnet Eisenhuth, the corn and oats kind, was here on Sunday; he said ice has an inch thick at east end, on the run.

A rumor that a Sunday school will be started in High valley; that would be a fine thing that might lead our rising generation to believe that there is a stronger power than pitching horse shoes and fighting.

**PROFIT**

The matter of feed is of tremendous importance to the farmer. Wrong feeding is loss. Right feeding is profit.

The up-to-date farmer knows what to feed his cows to get the most milk, his pigs to get the most pork, his hens to get the most eggs. Science.

But how about the children? Are they fed according to science, a bone food if bones are soft and undeveloped, a flesh and muscle food if they are thin and weak and a blood food if there is anemia?

Scott's Emulsion is a mixed food; the Cod Liver Oil in it makes flesh, blood and muscle, the Lime and Soda make bone and brain. It is the standard scientific food for delicate children.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.
