I suppose the readers will wonder where this Plum Grove is, that it has so much news that there are two correspondents for this paper. Oh! well if they would know the many good people there are in this community, they would not wonder for in last week's paper there were three correspondents, two Plum Grove and one Kellerville and they are gathered within 3 miles; now Charley, if all the towns would be so well represented you would have to enlarge the paper and you would get more subscribers.

GAME AND FISH LAWS.

At the late session of the legislature there were some changes made in the game laws. So far as may interest sportsmen in this section of the state, the Centre Democrat summarizes the law as now in force:

October 15 to December 15, inclusive, wild turkey, quail, pheasants and black, gray and fox squirrels may be killed; woodcock from October 15 to December 15 and during month of July; elk, wild deer or fawn may be shot in the month of November only; hare or rabbit, from November 1 to December 15; rail and reed birds, in September, October and November; upland or grass plover, from July 15 to January 1; web-footed wild fowl, September 1 to May 1; wild pigeons, at any time except when on or within one mile of nesting grounds. All game not mentioned is unprotected, including 'coons and 'possums.

Under the Act of April 14, 1903, non-residents, hunters and unaturalized, foreign-born resident hunters, are required to take out a license before hunting. The fee is fixed at \$10 and the license is issued by the County Treasurer. The penalty for violating this law is a fine of \$25.

Legal fishing for game fish is restricted to the use of the rod, hook and line, or to hand-line having not more than three hooks, or to trolling line with spoon-hook. Speckled trout, or California mountain trout, may be taken from April 15 to July 15, inclusive; the legal day's catch is limited to 50, and trout less than 6 inches must not be taken. Lake or salmon trout may be taken from January 1 to September 1, inclusive.

Bass of all varieties, pike, pickerel, sun-fish and muscalonge may be taken from June 15 to February 15, inclusive. Black bass must not be taken under seven inches. In the Delaware river and boundry lakes, this limit is increased to nine inches.

Other fish are without protection. Such protection as was accorded carp, catfish, eels and suckers have been withdrawn by the Act of March 11, 1903, repealing Section 9 of the Act of May 29, 1901.

By the Act of April 6, 1903, bullfrogs and terrapin are placed in the same category with game fishes. The taking of frogs is prohibited save only from July 1 to November 1 to March 15.

TRUE PREVENTIVE OF HAY FEVER.

Hyomei Destroys Germs of the Disease and Keeps People Well.

There can be little or no doubt as to hay fever being a germ disease. It is, too, one disease where prevention is much easier than cure.

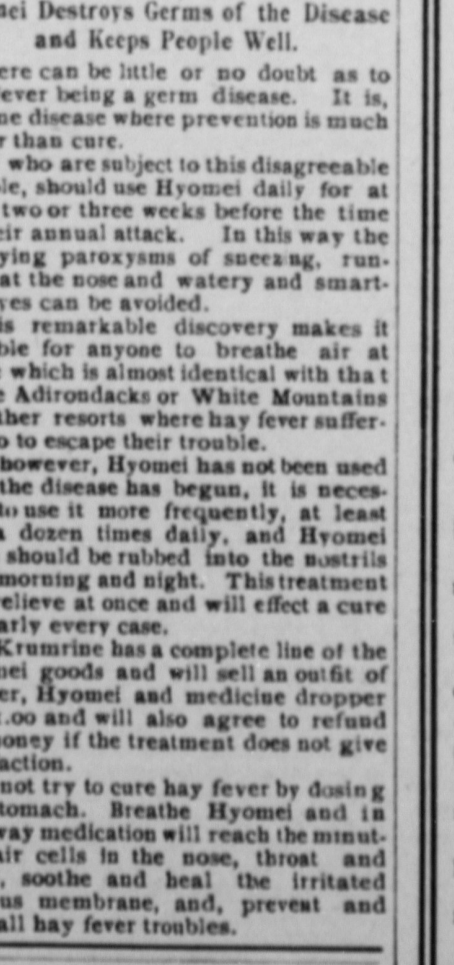

All who are subject to this disagreeable trouble, should use Hyomei daily for at least two or three weeks before the time of their annual attack. In this way the annoying paroxysms of sneezing, running at the nose and watery and smarting eyes can be avoided.

This remarkable discovery makes it possible for anyone to breathe air at home which is almost identical with that of the Adirondacks or White Mountains or rather resorts where hay fever sufferers go to escape their trouble.

If, however, Hyomei has not been used until the disease has begun, it is necessary to use it more frequently, at least half a dozen times daily, and Hyomei Balm should be rubbed into the nostrils both morning and night. This treatment will relieve at once and will effect a cure in nearly every case.

S. Krumrine has a complete line of the Hyomei goods and will sell an outfit of inhaler, Hyomei and medicine dropper for \$1.00 and will also agree to refund the money if the treatment does not give satisfaction.

Do not try to cure hay fever by dosing the stomach. Breathe Hyomei and in that way medication will reach the mucous air cells in the nose, throat and lungs, soothe and heal the irritated mucous membrane, and prevent and cure all hay fever troubles.
