

# EVENTS OF SEVEN DAYS PAST

Classified, Explained, No Sensationalism or Partisanship

## COMMERCE and INDUSTRY

### Financial.

**Booming Marconi Company.**  
During the past few days extensive advertisements of stock in the new Marconi Wireless Telegraph company have appeared in the leading papers. This is the formal beginning of the financial flotation of the Marconi system, which has stations on the Atlantic coast of Canada and New England and the privilege of introduction in Cuba and Alaska.

**Lake Superior's Receivership.**  
At the instance of Speyer & Co., the New York creditors of the defunct Consolidated Lake Superior company, the Canadian courts have appointed B. F. Frackenthal, Jr., of Easton, Pa., as receiver of the Canadian subsidiary works. The board of directors has accepted a plan for the company's reorganization. Many hundred workmen who were employed by the Lake Superior have come into the works at Sault Ste. Marie and the Soo in great distress because they have not received their wages. They began a riotous attack on the works, and troops had to be called to maintain order.

Later Mr. Clergue, the promoter of the company, managed to raise funds to pay off the men and hoped to arrange a reorganization.

**Brown Still King of Cotton.**  
The New Orleans clique headed by W. P. Brown scored a triumph when September cotton advanced \$7.50 a bale. Thus the corner in cotton, which was begun in last June on the old crop, has extended over into the first new crop month and affected the markets of the whole world. Brown is said to have cleared \$500,000 in one minute when he walked into the cotton pit at New York and bid \$5 a bale above the market. The whole cotton corner has given him a profit of over \$7,000,000.

**Big Railroad Earnings.**  
Annual reports for four of the great railroad systems just out indicate a prosperous year. The Great Northern, in spite of lower freight rates, increased its gross earnings \$5,000,000. Reading's receipts increased \$3,256,955 in spite of the loss during the miners' strike and the 10 per cent wage increase. The New York Central made an increase of \$6,701,910 in gross earnings, but this was offset by increased operating expenses. The annual report of the Lehigh Valley railroad shows gross earnings of \$26,654,503, an increase of \$1,700,000 in net earnings.

**Reorganization of the Cramps.**  
Charles H. Cramp has resigned the position he has long held as president of the Cramp Shipbuilding company of Philadelphia, and Henry S. Groves has been elected his successor. Edwin S. Cramp was chosen vice president. R. W. Davenport was made general manager.

**Petroleum Higher.**  
Crude petroleum has gone up 3 cents twice in the past week, due, it is said, to the decrease of the output and the failure to discover new oil fields. Old wells are on the wane.

### Industrial.

**Side Door Passenger Cars.**  
The Illinois Central railroad has now brought out a standard passenger coach for suburban service with a dozen side doors on opposite each pair of seats. The current Scientific American speaks of this as an epoch making car. The advantage is in speed of loading and unloading. The cars are constructed of steel.

**A Four Ton Copper Nugget.**  
The report has just reached Seattle that a miner on Anvil creek, Nome, has found a copper nugget weighing four tons and eleven cubic feet in size. It will be exhibited at the world's fair. In the same section a gold nugget

weighing 182 ounces has just been found.

**Big Tin Deposit in Alaska.**  
A 100 foot ledge is reported to have been found near Lost river in the Cape York district north of Cape Nome, Alaska. Details of the discovery have just been brought in by former Lieutenant Governor Hutchinson of Idaho.

**Butterine Fines Contested.**  
William J. Moxley, the "butterine king," started suit in the United States circuit court at Chicago to recover \$35,000 which he was made to pay as penalty for alleged violation of the law. Moxley contends that the use of palm oil for coloring is not an artificial process.

### The Markets.

Baptized in its own deluge of watered stocks, the speculative market appeared to be again on steady feet, with an upward climb, after the plunge of Sept. 28, which carried many standard securities down with the undigested ones.

The latest report by Bradstreet's says corn has passed out of the shadow of frost damage, as the yields are bigger and of better quality than a year ago in the northwest.

Prices of cereals had a downward turn on the strength of this report and better foreign crop signs.

The feature of the fall fruit market in the east is the flood of windfalls, so great that special fruit trains on the New York Central are run into New York. Prices, nevertheless, were steady.

Provisions and meats show no notable changes in eastern markets.

Petroleum has had two advances of 3 cents each due to increase in total output.

Cotton corner still complete.

### Labor.

**Labor's Reply to President.**  
The executive council of the American Federation of Labor gave out a statement Wednesday bearing directly on the "open shop" decision of President Roosevelt signed by all the members, including Messrs. Gompers and Mitchell. It takes the ground that the working of union and nonunion men in the same employ makes agreements with employers impracticable and that no business can be run successfully part union and part nonunion. It declares for the eight hour day and the right to strike, denouncing interference by injunction. It admits that only moral suasion should be used in converting nonunionism. It declares that organized wage earners "cannot, must not and will not surrender one jot of that which they have secured, must organize the yet unorganized, unite and federate those already organized, to present a solid phalanx of the grand army of labor in earnest and emphatic protest against judicial usurpation or capitalistic invasion of our rights, attempted no matter by whom or from whatsoever source."

**Iron Workers Re-elect Buchanan.**  
Somewhat to the surprise of every one, after many evidences that Sam Parks was in control of the iron workers' convention at Kansas City, the faction of the New York delegate was beaten Saturday when President Frank Buchanan was re-elected by a vote of 43 to 40.

**Labor Notes.**  
At Chicago a movement has been started among employees to form a national association to combat the tendency toward socialism in the unions. A national conference has been called for Oct. 28.

Strike of omnibus drivers in Berlin resulted in serious riots Oct. 2.

The strike of the flour mill men at Minneapolis has continued, many of the mills still grinding with the use of nonunion labor under police protection.

**London "Ancients" at Boston.**  
The city of Boston has thrown its doors wide to the visiting Ancient and Honorable Artillery Company of London.

**Accidents and Disasters.**  
Twelve persons were reported drowned in the foundering of the lake steamer Eric L. Hockley in Green Bay Oct. 4.

An express train on the Pennsylvania railroad ran down a party of merry-makers at Sharon Hill, Pa., Sept. 30, killing five and injuring three.

Five persons were killed and a score injured in a collision between a train on the Wisconsin Central and a Chicago street car.

**Deaths.**  
Sir Michael Henry Herbert, British ambassador of the United States, died at Davos-Platz, Switzerland, Sept. 30 after a long illness from consumption.

Lady Herbert, who was with him when death came, is the daughter of R. T. Wilson of New York.

Henry D. Lloyd, widely known as a social economist and author of "Wealth Versus Commonwealth," a history of the Standard Oil company, died at his home near Chicago Sept. 29.

John H. Dolph, the famous artist known as the "Landseer of America," died at New York Sept. 29.

## Art, Music, Letters

The striking feature of the dramatic season, now in full swing, is the large number of popular novels that are being staged. The past week's additions to this list include Kipling's "Light That Failed," produced at Buffalo by Forbes Robertson and Gertrude Elliott; W. H. Crane in "The Spenders," by H. L. Williams; Dustin Farnum in Owen Wister's "Virginian."

Justin McCarthy's "The Proud Prince" was censored at Detroit on account of its harem scene. Southern said he would cut out objectionable parts.

The monument to Wagner has been unveiled at Berlin.

Among the more notable new books are Kipling's "Five Nations," twenty-five poems dealing with the Boer war (Doubleday, Page & Co.), and "The Adventures of Gerard," in which Conan Doyle revives his famous detective character, Sherlock Holmes (McClure).

## RELIGIOUS

**First Encyclical of Pius X.**  
Pope Pius X. declares in his first encyclical, published Oct. 3, that he accepted the pontificate reluctantly and urges the co-operation of the bishops, especially to conserve the sanctity of the marriage tie. It proclaims liberty and independence for the church.

**Bishop Potter's Coadjutor.**  
The Rev. Dr. Greer of St. Bartholomew's was elected coadjutor to Bishop Potter Wednesday at the annual convention of the New York Episcopal diocese, it being the twentieth anniversary of the bishop's service. Bishop Potter declared against dropping the "Protestant" from the church name.

**Dowie's Restoration Host.**  
Eight special trains over different railroads have been engaged to carry John Alexander Dowie, head of the Chicago Zionist movement, and his "restoration host" to New York city. A great mission is to be held in Madison Square Garden from Oct. 15 to Nov. 1. The Zion white robed choir of hundreds of voices, Zion City brass band, hundreds of officers of the church and 4,000 members will constitute the host. They come to convert New York to Zionism.

**Miscellaneous**

London "Ancients" at Boston.

Accidents and Disasters.

Deaths.

**Old Ostrich Plumes.**  
Old ostrich plumes may be renovated and really handsome ones made of them. If they are composed of layers take them apart; then take a single feather in the left hand, holding the underside of the feather toward you. Now take a rather sharp case knife in the right hand and draw singly each spray of the feather across the edge of the knife, being careful not to cut them off. When one side is curled turn the feather around and curl the other side in the same way. If well done it will curl up, covering the stem of the plume entirely. When all the feathers are curled fasten them together again, reserving those that are best curled for the top layer.

**JUST THE GIST OF IT ALL**

Two storm centers darken the field of world politics this week, as viewed from the vantage of our own busy and peaceful land. While in the foreground are seen the monarchs of Austria and Russia calling a halt on Turkey's frightful course of pillage and massacre throughout her rebellious Macedonian provinces, there appears in the background of the far east the long expected crisis in the relations of Japan and Russia. The day set for Russia's evacuation of Manchuria by solemn agreement is Oct. 8, but instead of signs of moving there are indications of more troops pouring in and more forts being erected. In anticipation of aggression south of the Yalu river on Korean soil Japan has already begun to send troops to Korea. The intervention in the Balkans may be too tardy, as already war is said to have broken out on the Bulgarian border.

The all important event in American politics is the final answer which President Roosevelt gave to the labor leaders in the Miller case, telling them that our government could not consider union membership in hiring employees. The banners are up in Massachusetts, Republicans making an issue of mob violence and Democrats leading on trusts and imperialism. Fair-banks willing to be Roosevelt's running mate. Populists to have a national ticket in the field. New York city party lines all in a tangle since Tammany nominated fusion candidates to run with McClellan.

Organized labor is having the battle of its life in Colorado, where state troops still guard Cripple Creek mines. Minnesota millers holding out against demands of union employees. Effort to compromise disputes on the B. and O. failed. Big slump in stocks followed by an upward movement. Cotton corner triumphant. Tin deposit found in Alaska. Side door cars on Illinois Central. Lake Superior company in hands of receiver, but employees paid. Philadelphia roused for thirty-five foot channel in Delaware river.

Cook expedition failed to scale Mount McKinley. Registration at nearly all the leading colleges shows large increase in enrollment of students. New pope's first encyclical issued. Execution of Van Wormer trio in New York revives opposition to capital punishment. Chicago finished celebration of one hundredth anniversary.
