Potter Twp.

It is possible from present events and former surveys, that if the Wabash rail-road is built it will run through the south side of Potter township and put us on a through trunk line. That would be FINEST FUPS at LOWEST a great convenience as well as benefit to the south side of this township, and the people feel elated over the prospect of having a main line instead of a branch. With fast passenger and freight trains, and a dozen of each eyery day, would make things boom lively for us.

Centre Hill folks are already planning where the Wabash station will be, and that it will be a smart town afterall yet. Wabash may not be all "bosh" afterall. Calvin Ruhl, of Potter's Mills, in the spring will move to the Colyer farm, east of Old Fort.

High Valley.

Hello, Coburn scribe, I made my trip up Salt River not down as you state in the last weeks items, I took my old stand; was going to have my room papered but a telegram came to my shanty from New York saying, "don't make any ex-pense, as you have to move back next November."

The Pine Creek Scribe was boring for a gas well and struck a turpentine well, so the dogs are leaving the valley and those not leaving wore leather pants, and tails tied down. I tell you the dogs dont fool with the Pine Creek scribe; they pinch their tail as tight as they can and sneak away. I did not see a medi-cine man up Salt River, but saw a prince with a gun; he seemed to be a fine man; the people up the River are all honest, you can leave every tool along the road and they never molest them. Lewis Spigelmeyer and two young gentlemen from Philadelphia called on the scribe to bid a farewell and wish him a lucky journey. Sidney Ginter and wife, from Lewisburg, came to see the scribe before he left for Salt River; Mr. Ginter represents the white deer valley railroad Co. J. F. Duncan and Zrath Co. Coming up Salt River one day it put me in mind of forty years ago, when I was a small boy; a man by the name of Ketner used to travel from house to house and sharpen razors, and carried his oil and whet stone in a pouch; but the one I took for Ketner had no pouch, but a gun on his shoulder. The only business here is cutting logs; the toothpick business is shut down on account of no timber. Hunting is a big business here always; on Saturday one can see young and old, some so stiff that they can hardly step over a log. I would like to hear from the Blue Rock and also from the Traveler Gap scribe; the Fiedler scribe is alright, we can smell that by east wind. To day a week Levi Spigelmeyer will be in Bellefonte, unless he takes the wrong train and strikes the river; if so don't fail to call on the scribe and tell me how many milk cans Danny missed on hollow eve. Before I close I must say, it's now 9 o'clock and I have to get ready for
