Millheim.

It appears that the water bee is still buzzing about the hearts of the Water Co. Council. According to a resolution passed at its last meeting it appears that they are still greatly inconvenienced and their property endangered and frequently destroyed for want of a water supply, when in fact the resolution is merely a pack of lies and patent to the citizens, as no property has been destroyed for the want of a water supply for either the grafters or anyone else for years and is simply a Quay job and an attempt to palm off a gold brick upon the taxpayers of the town for the benefit of the Water Co. council. This resolution is to prove it, a certain G. J. Spangler the water Co's stool pigeon who is no citizen and unknown here, to have the franchise of putting in a water plant for the borough; this resolution was R. R. through without any notice or consultation or giving it a careful consideration on the part of the officials, which shows that the franchise is to be for the benefit of the projectors as before as there seems to be no stipulation in the giving of the franchise to a strange party and will place this smart set again in trouble.
