ONE STEP AT A TIME.

The lantern throws its dim light only just far enough for one step. But as only one step at a time can be taken that little circle of light is large enough to walk in.

People who are sick with lung disease cannot be blamed for the desire to get well quick. But even on the road to health we can only take one step at a time.

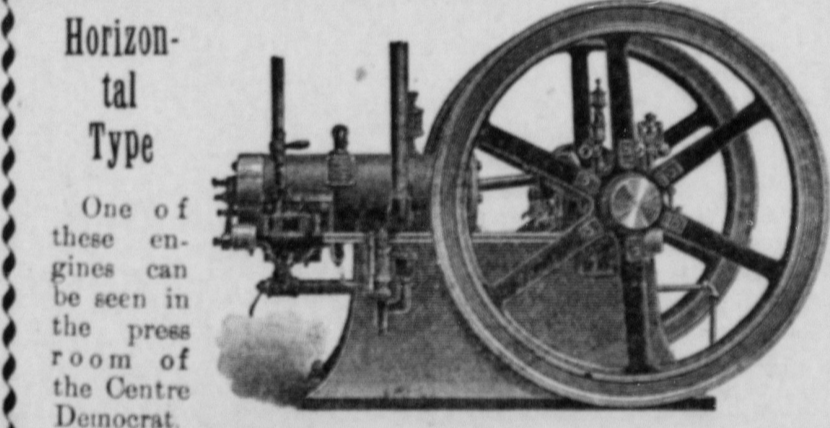

Doctor Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.

FAIRBANKS Gas and Gasoline Engines

At the mines, at Clarence, by the wagon, load or car load. Feed, hay, grain and other produce taken in exchange for coal.

CHAMBERS & UZZLE, Clarence, Pa.

TO CONSUMPTIVES.

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease Consumption, is anxious to make known to his fellow sufferers the means of cure.

EDWARD A. WILSON, Brooklyn, New York.

ANALYSIS OF CURRENT EVENTS. Classified, Explained, No Sensationalism or Partisanship.

COMMERCE and INDUSTRY

Commercial.

Mr. Schwab on the Stand. The testimony of Charles M. Schwab, ex-president of the steel trust, in the shipbuilding receivership hearing made important disclosures and admissions.

He said he was still the largest stockholder in the steel trust and denied that the formation of that great combine was based on inflated values of the constituent companies.

The expected happened, and 40,000 investors in the common stock of the great steel trust felt defrauded when the directors of the trust met Jan. 5 and voted unanimously not to pay the quarterly dividend on the common stock.

War News Affects Markets. The belief that war between Russia and Japan was imminent has been depressing to the stock market, while causing a sharp rise in wheat in consequence of which J. Ogden Armour made a small fortune from his corner in wheat, selling 5,000,000 bushels at an advance in a single day.

Industrial.

Manufacturers as Miners. The heads of a number of large manufacturing concerns in or near Boston have gone in a body to inspect coal lands in the New River region of West Virginia, with a view to purchasing extensively in order to mine coal for their own use.

Railroad Tests Its Men. Moved by the numerous railroad accidents recently, the officers of the Northwestern railway went in person Jan. 7 to a small station on their line near Chicago and put out all the signal lights. The absence of any light is by rule a danger signal, the same as a red light.

Steel Mills Start Up. Over 40,000 steelworkers who had been idle for months have been put to work again since the beginning of the

new year in the mills of the Pittsburg district. The resumption is said to be due to a better demand for iron and steel products. Nevertheless the workers in this district and in the west are greatly dissatisfied over the recent cut in wages, and there was much talk of a general strike in the near future.

Labor.

Unionizing All Women. It is reported that organized labor in Indiana is about to take the step of organizing all the wives and daughters of union men to increase the influence of organized labor.

Are Unions Breaking Up? David M. Parry, head of the Citizens' Industrial Association of America, said at Chicago last week that labor unions were disintegrating all over the country and their members flocking to the standard of his association.

Evicting Striking Miners. The antagonism between the Colorado miners' unions and the militia was intensified last week by the policy of wholesale eviction of miners under the vagrancy ruling.

RELIGIOUS

Joan of Arc Now "Venerable." It is now proclaimed officially by papal authorities at Rome that the Maid of Orleans has passed the second stage of her canonization as a saint.

A sensation in Rome has been caused by the pope's request that ladies attending receptions where prelates are expected will not wear low cut gowns.

EDUCATIONAL

Opposing Military Drill. One sign of reaction against the popular tendency toward military drill in the public and private schools is the refusal of the Chicago school management committee to sanction the purchase of wooden guns for the boys at the Parental school.

Palmer university, Muncie, Ind., has been closed for this term on account of the Palmer will litigation, though the fund to secure the \$100,000 offer was raised.

regarding the law by permitting Bible reading in the schools. Governor Odell of New York has recommended a more definite separation of the state regents from the authority of the superintendent.

The Northwestern university has begun with the new year three practical courses at its extension headquarters in Chicago—one for business men, one for teachers and one for authors.

SCIENTIFIC

Slept Outdoors at 30 Below. An extreme instance of the outdoor treatment for tuberculosis which attracted wide attention last week during the cold wave was that of two women, Miss Alice Flint, aged twenty-four, and Mrs. G. A. Allworth, aged forty, who slept all night outdoors on the veranda of their house at Meriden, Conn., when the thermometer registered in the neighborhood of 30 degrees below zero.

Chloroform Aids Plants. The London Lancet, Jan. 9, gave details of recent experiments of Dr. Johansen at Copenhagen and Le Blanc at Paris proving that certain plants blossom sooner if subjected to a vapor of chloroform.

Notes. The London Surgical society has the report of an operation where a swallowed nail was extracted by means of a large magnet.

Notes. The London Surgical society has the report of an operation where a swallowed nail was extracted by means of a large magnet.

SOCIOLOGICAL

To Make Travel Safe. In view of the recent frequency of bad railroad accidents in many parts of this country, C. O. Prouty, one of the interstate commerce commissioners, has come out squarely advocating absolute government control of all railroads.

Jerome in Chicago. New York's fighting district attorney, William Travers Jerome, was a guest of several clubs at Chicago last week. While there he said the Chicago police force was far inferior to that of New York and told how the latter brought in their captive thugs "in fragments."

Miscellaneous

The Maud S. Record Stands. A joint conference of the presidents of the three principal trotting associations of the country has just decided that no record could be established with a wind shield other than the dirt shield and pace maker, that consequently Lou Dillon's 2:05 performance with ball bearing sulky and wind shield was not a record and that the old record of 2:08 1/2, made by Maud S. with wheel plain axle sulky, still stands.

Accidents. Three trainmen on the Brooklyn elevated were killed and several passengers injured in a collision Jan. 7.

Deaths. Parke Godwin, the veteran editor and author of New York, at that city Jan. 8, aged ninety-seven.

Deaths. Parke Godwin, the veteran editor and author of New York, at that city Jan. 8, aged ninety-seven.

Waiting For the First Gun In the East

From day to day the hope of peace between the vast empire of Russia and its small but resourceful rival, the empire of Japan, has dwindled since Jan. 6, when the Russian reply to Japan's demand was delivered to the mikado's ministers at Tokyo.

Admiral Alexeieff. At the Korean capital foreign marine guards had come to defend the legations, the Americans first and the Russians on foot, being refused transportation. The Japs took possession of their two new warships at Genoa and started them for the east.

Deaths. Parke Godwin, the veteran editor and author of New York, at that city Jan. 8, aged ninety-seven.
