

WHAT ALL THE WORLD IS DOING

Trend of Civilization in All Lines From Week to Week

POLITICS and GOVERNMENT

General.

Tammany a Free Lance.

While the leading men in the Tammany organization at New York have expressed their personal preferences for Cleveland or Parker, it has been announced, semi-officially, that the delegation will go to the St. Louis convention uninstrued for any candidate. Leader Murphy says that Mayor McClellan's name will not be proposed unless it is called for by other states than New York.

Gray Boom Reappears.

Following an interview between President J. J. Hill of the Great Northern and Senator Gorman at the senator's home in Washington, the press dispatches reported a decided revival of the Democratic presidential boom for Judge Gray of Delaware. Mr. Hill declared himself in favor of the nomination of Gray, and it is generally conceded that Gorman is out of the race, his eastern strength having been undermined by the election of Rayner, showing loss of prestige in his own state.

Executive.

Plan to Localize the War.

Taking the cue from Germany, which called the attention of the United States to the desirability of limiting hostilities in the far east to the two combatants, Secretary of State Hay queried the several powers of Europe as to insisting on the integrity of the Chinese empire and localizing the war zone to the territory directly in dispute. Favorable replies have been received from the powers, and identical notes were sent to Russia and Japan inviting their cooperation in keeping the hostilities in as small an area as possible. If the combatants agree to this the powers will endeavor to keep China strictly neutral.

Legal and Criminal.

Butler Acquitted of Bribery.

Edward Butler, the St. Louis millionaire politician, was acquitted at Fulton, Mo., Feb. 6, of the charge of bribing members of the St. Louis house of delegates with \$47,500 to pass the city lighting bill in 1890. This verdict was Circuit Attorney Folk's first real defeat in his antibribery crusade.

Vienna's Laborers "Officials."

The recent decision of the Vienna courts that street sweepers and laborers on the city trolley lines are officials and as such are entitled to reverence from the public as superiors has caused numerous arrests for "resisting officers." On Feb. 5 the famous tenor Pagan was arrested for refusing to obey an order from a street sweeper. He was discharged with a warning.

Criminal Notes.

Two negroes were lynched for the murder of James Eastland, a well known planter of Sunflower county, Miss., and one of his workmen. Three young highwaymen held up two freight trains within a few minutes near Pacific Junction in Chicago in the early evening of Feb. 6. The conductors of both trains were robbed. Miss Eleanor Anderson of New York began suit for \$50,000 damages for breach of promise against James Abel, who three months ago proposed marriage to her under the name of J. Ogden Golet, Jr. Abel has been extradited from Canada and is out on bail.

Legislative.

Exposition Loan Authorized.

By a vote of 172 to 103 and in spite of the opposition of the Republican leaders the house Thursday concurred in the senate amendment to the urgent deficiency bill authorizing a loan of \$4,000,000 to the Louisiana Purchase exposition.

Date For Canal Treaty Vote.

In executive session the senate reached an agreement to bring the Panama canal treaty to a final vote on or before Feb. 23.

Foreign.

Reyes President Elect.

General Rafael Reyes, Colombia's envoy extraordinary, received word by cable at New York that he had been elected president of Colombia. His term will begin next August and is for four years. General Gonzales was elected vice president. He is minister of war under the present administration.

General Reyes at once sailed from New York to Paris, there to represent his country before the French courts for the recognition of Colombia as a stockholder in the Panama Canal company and to protest against the sale of

its concession to the United States. Before going he suggested that the whole matter of Colombia's claim on Panama should be submitted to three members of the United States supreme court for final arbitration.

Lord Roberts' New Office.

Field Marshal Lord Roberts, who became commander in chief of the British army in 1900, has accepted the appointment of the new office of inspector general under the reform program.

SCIENTIFIC

Scientists Imbibe Sunshine.

Sunshine cocktails which glowed before and after taking were served to the eminent scientists who attended the banquet given at the University club at New York. The new drink, produced by placing a tube of radium in the glasses, was taken in the dark and was said by the guests to turn their hearts into arc lights and to illuminate their interiors like a bite of the sun. Other novelties were floating balloons, a skeleton dance and a toy cock fight, all made luminous by a coating of radium paint. College songs were directed by a glowing baton.

New Moth Destroying Method.

The Massachusetts authorities are planning to introduce a new method of fighting the gypsy moths, which have done so much damage to agriculture in that state and for whose extinction as a national enemy congress has been asked to appropriate \$250,000. The new plan of breeding parasites to attack them has been tested in California by Mr. Koebel of Alameda and found effectual.

New Active Substance.

Professor Markwald, a German scientist, has discovered an extremely active substance, which he has named radiotellurium, in pitchblende. It is in minute quantities, far smaller than the quantities of radium in pitchblende, and contains tellurium.

In Honor of Edison.

The American Institute of Electrical Engineers gave a brilliant banquet at New York Thursday night in honor of the fifty-seventh birthday of Thomas A. Edison and the twenty-fifth anniversary of the introduction of the incandescent electric lamp, Edison's first great achievement. With a key and circuit established in the banquet room Mr. Edison with his own hand ticked off his speech. A fund of \$2,000 was presented to the institute to establish an annual Edison medal for the best work in electricity.

SOCIOLOGICAL

Antilandslip Sign Tax.

Leader Colby of the Republican majority in the New Jersey house has brought in a bill on the line suggested in Governor Murphy's message providing for a tax of \$5 a square foot, by the year, for advertising signs along rail-

Want Corporal Punishment.

The Brooklyn Teachers' association sent a petition to the New York board of educators requesting the privilege of reviving corporal punishment under the rules that existed before the cities were consolidated.

Russia Stunned by Japan's Blows

Two things the world knows now about which it was just guessing a few days ago—Japan was not bluffing, and Russia was not prepared. Lulled into the pleasant dream of security and invulnerability because of her great superiority in mere bulk and numbers, Russia pursued her tortuous path of diplomatic evasion and territorial expansion. Even when Japan broke off all negotiations, Feb. 6, the great bear went on in leisurely self assurance with preparations for a fight at some future time.

It was a rude awakening when on the very next night, under cover of darkness, the Japanese fleet, commanded by Vice Admiral Togo, maneuvered close enough to Port Arthur to send several of its torpedo boats where they were able to strike the Russian fleet lying at anchor in the outer harbor. The great battleships Cesarevitch and Retvizan and the armored cruiser Pallada were so badly damaged that they had to be beached. Early on the following day the Japanese fleet engaged the Russians at long range, doing considerable damage, while none of its ships was injured.

Russia was not yet recovered from this terrific blow when another almost of equal importance was struck by the sea power of Japan at the Korean port of Chemulpo. The Russian cruiser Variag (American built) and the gunboat Korietz, stationed there, were surrounded by a number of Japanese ships which came to cover the landing of a large force of soldiers. The Russians at first attempted to escape, but they were raked fore and aft by the Japs and had to be abandoned after a heroic defense. Thus in a single day the tables were turned by the daring and prowess of Japan's navy, which proceeded to bombard Port Arthur, bottling up the Russian remnants therein as we did the Spaniards at Santiago, while lying in wait for the Russian ships on their way from the west and pursuing the other Russian squadron which later left Vladivostok to harry the northern coasts of Japan. Besides all this, the Japs captured a number of merchant vessels and conveyed the army rapidly to strongholds in Korea, chief of which was Masampo, commanding the Korean strait.

The shock and seriousness of these Japanese victories had the effect of bringing forth a prompt declaration of war from the czar Feb. 9. In this he complained because the attack had been made without formal notice having been given and without waiting for "the last responsive proposals of our government." He calls on his subjects to defend the fatherland. On the other hand, the mikado reviewed the story of Russia's broken promises.

Other Russian reverses reported before this review closed were the capture of 2,000 Russian troops on transports bound for Korea, the dynamiting of a bridge on the Manchurian railway, killing thirty, and the accidental blowing up of a troopship at Port Arthur by a harbor mine, killing ninety-four men. A land battle was expected near the Yalu.

roads. The tax is to be collected by the municipalities in which the signboards are situated or by the owners of the property. Failure to pay the tax is made punishable by a fine of \$250.

The New Iowa Idea.

The newspaper funny men are paying considerable attention to the humorous side of a very serious movement in Iowa, started by certain medical associations whose object is the legal regulation of marriage. A bill is now before the house providing for the appointment of a state director of marriage and for instruction in and diploma for domestic science.

Professor Matthews of Chicago university is among those who approve this plan, and he says that young men as well as young women should be taught something of the care of children and the science of keeping house.

Sentenced to Twenty Baths.

For vagrancy and neglect to wash her face Judge Berka of Omaha, Neb., sentenced a woman to twenty days in jail and a compulsory bath on each of the days. She admitted not having washed for three months.

Hanna's Life Work.

Senator Hanna, in a striking article for the February National Magazine, outlined the object to which he desired "to consecrate" the remaining years of his life. This is nothing more or less than the work of the Civic Federation in carrying on an educational campaign for adjusting the relations of capital and labor along moral as well as practical lines.

Italians as Farm Hands.

It is expected that thousands of Italian immigrants during the coming season of agriculture will be available as farm laborers, whereas heretofore the influx from Italy has gone almost exclusively to the large cities. The Italian government has appointed a representative to co-operate with the immigration bureau, with the object of directing immigrants to good places on farms.

EDUCATIONAL

Pick and Shovel Laboratory.

A joint summer course in practical mining is to be undertaken during the coming season by the mining departments of Columbia university, the Massachusetts Institute of Technology, Yale and Harvard. The senior students of the four colleges are to go into camp in one of the mining districts of Colorado and study mining with pick and shovel under the direction of skilled miners.

\$1,200,000 For Education.

By the will of the late James A. Woolson of Cambridge, Mass., Boston university will eventually receive \$600,000, Radcliffe college \$300,000 and Wesleyan academy \$300,000. The money has been left in trust to the donor's wife and children and their issue.

Want Corporal Punishment.

The Brooklyn Teachers' association sent a petition to the New York board of educators requesting the privilege of reviving corporal punishment under the rules that existed before the cities were consolidated.

Perfect Motherhood.

If an artist were to paint a picture of a mother and child he might follow his own fancy in many directions, but in one thing he must be true to nature,—the mother and child must be in perfect health. Such a picture would only serve to remind us how little perfect motherhood there is in the world, which is full of weak mothers and wailing babies.

Motherhood is made easy for those women who use Dr. Pierce's Favorite Prescription. It gives the mother strength for her trial and makes the baby's advent practically painless. It gives health and strength to both child and mother.

"I take pleasure in informing you of the birth of a boy in perfect health, on May 18th, 1899," writes Mrs. L. E. Corti, of Waltonville, Pa., Box 25. "I cannot find words sufficiently strong to express to you my thanks, for my baby came almost without pain, and when my husband arrived with the doctor the child was already born. The neighbors who were with me, my husband and the doctor could not believe their eyes. Having suffered so much before I never believed myself able to be delivered of a living child.

"I recommend Dr. Pierce's Favorite Prescription to all young women who are in the same condition that I was in as one of the best remedies in existence. I have used eight bottles and find myself in perfect health."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

FREE. Dr. Pierce's Common Sense Medical Adviser is sent FREE on receipt of stamps to pay expense of mailing ONLY. Send twenty-one one-cent stamps for the book in paper covers, or thirty-one stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

RAILROAD SCHEDULE

PENNSYLVANIA RAILROAD AND ELIZABETH

In effect on and after Nov. 29th, 1903.

Trains arrive at and depart from Bellefonte as follows:
