## COMMERCE and INDUSTRY

### Commercial.

#### Cable and Telegraph Trust.

An investment trust to be known as the Mackay companies has just been organized under the laws of Massachusetts by President Clarence H. Mackay of the Commercial Cable company to provide for the development of the companies founded by the late John W. Mackay. Mr. Mackay says that he has selected as co-trustees men of conservative reputation and of various ages, so as to secure a long continued and consistent policy. The stockholders of the Commercial Cable company have been invited to deposit their stock in exchange for shares in the trust, the latter having a capital stock of \$30,000,000.

#### Gum Camphor a Dollar a Pound.

The price of gum camphor, which the world depends upon Japan to produce, has steadily risen since the outbreak of the war. Last October the wholesale price was 58 cents a pound, and now it is nearly \$1 a pound at wholesale. A camphor famine is predicted unless the plants at Niagara can supply the demand fast enough.

#### Insurance Loss at Rochester.

Later estimates of the property loss in the Rochester fire place the amount at about \$3,000,000. The insurance loss is believed to aggregate nearly \$2,000,000. The risks had been well distributed among nearly all the companies doing business in New York state.

#### Another Link In Gould Chain.

The Western Pacific railway, which is expected to become the western outlet of the Gould transcontinental system, has forged another link in the chain by purchasing the Alameda and San Joaquin railroad from Stockton, Cal., to Tesla.

### Labor.

#### Miners' Strike Was Expected.

The joint scale committee of the bituminous mining districts of the central west, after several days' session at Indianapolis, adjourned March 2 without having reached an agreement. The counter demands were referred to a subcommittee composed of two miners and two operators from each of the competitive states. The convention was to await the action of that committee. No way out of the deadlock was visible, and a general strike was believed to be the outcome.

#### World's Fair Labor Out.

About 1,000 men employed as laborers in landscape gardening by the St. Louis fair managers struck Monday when informed that the summer schedule of wages, 20 cents an hour, would be enforced. Since October they have received 25 cents an hour.

#### Parry's Men on Strike.

Employees of the crating department of the Parry Buggy company at Indianapolis, whose president heads the National Organization of Employers, have gone out on being informed of a cut of 2 cents in the wage rate.

#### Jail For Union Men.

Judge Holdom of Chicago has sentenced five members of the Press Feeders' union, including the president, to fines and imprisonment for violating the injunction of the court in having intimidated other workers employed at plants under the ban of the union. The union itself was fined \$1,000, Secretary Shea got \$100 and six months, President Warner \$250 and three months and three others shorter jail sentences.

### Industrial.

#### Baltimore to Own Wharfs.

Unless the big railroad and marine corporations entering Baltimore succeed in heading it off, the movement

#### Japanese Soldiers Behind Embankment of Reeds—Actual Scene In War With China.

now under way to construct wharfs and docks owned by the city of Baltimore will go through. The transportation companies object to the plan for fear it will interfere with their own schemes.

#### Rich Ore Uncovered.

An abandoned mine in the Shawangunk mountains near Otisville, N. Y., has been found to be rich in lead and zinc ore, with traces of silver. A company has been organized to mine the ore.

#### State Owned Trolley Line.

A trolley line has been completed at Bismarck, N. D., extending from the depot to the capitol, about a mile and a half. It is owned and operated by the state of North Dakota, and it is the only electric railway in the United States which is not owned by a corporation.

#### New Haven Trolley Deal.

The New Haven and Hartford railroad has acquired control of the trolley system in and about New Haven, Conn., in order to meet the proposed new third rail line from Boston to New York by taking away one of its tributaries.

#### An Elevated Freight Line.

In order to relieve the freight congestion in Pittsburgh the Pennsylvania railroad has decided to construct a freight elevated and warehouses in the heart of the city at a cost of \$8,000,000. A new bridge will be built across the Monongahela to connect the new elevated line along Duquesne way at the Point, which will form a new route into the city.

### EDUCATIONAL

#### Law on Corporal Punishment.

The supreme court of Maine has decided that a schoolteacher has a right to inflict bodily punishment on an unruly pupil. The case was that of Prince A. Kilgore of Auburn, who sued Georgia M. Hartford to recover \$1,000 damages for having whipped his fourteen-year-old son in school.

#### Harvard's Short Cut Degrees.

The Harvard faculty of arts and sciences has decided that a man passing enough courses for the A. B. degree at the middle of his senior year may receive his degree at that time instead of waiting until the end of the year. This action has long been favored by President Eliot and more progressive members of the faculty and marks a radical departure at Harvard, where heretofore degrees have been awarded only at commencement.

#### Raising Princeton's Standard.

Over sixty students of Princeton have been dropped during the current year, mostly from the school of science, for failure to come up to the new standard of scholarship under the administration of President Wilson. The object of the committee on standing is "to make a Princeton degree count for something."

#### For Shorter Schooldays.

Professor T. C. Whitcomb of the Somerville (Mass.) high school advocates making the school session as businesslike as possible, so that children may learn to feel that it is an institution requiring as close attention as if they worked for a private corporation. To this end he urges an earlier closing of the day's session and limitation of home study. He also urges that lunch counters be under the direction of school authorities.

### SCIENTIFIC

#### Measuring Human Electricity.

Students in the physiological laboratory in the University of Chicago have devised an instrument to register the minute discharges of electricity from the nerves and muscles of the human body. It is known as the capillary electrometer and consists mainly of a fine glass tube with a hole in it no larger than a capillary gland. The mercury is placed in one end of the tube, which rests in a cup of acid, the tube

being joined by a platinum wire; thus the slightest discharge of electricity from a moving muscle is recorded on the mercury in the tube.

#### Electrical Coal From Peat.

Consul General Mason reports a recent invention in England of an electrical process for turning peat into coal. First the peat is freed from moisture by a rapid rotation in cylinders, after which a powerful current of electricity is passed through the remnants. Like a filament in an incandescent lamp the peat offers a resistance which causes heat and carbonizes the material.

#### "Motormaniacs" on the Road.

It is contended by Forbes Winslow, the English brain specialist, in the Automobile Magazine, that when racing motor cars reach a speed of eighty miles an hour they must in reality drive themselves, "for no human brain is capable of dealing with all the emergencies that may arise should that rate be maintained for any period worth speaking of." He would not be surprised if a new class of patients appeared—namely, "motormaniacs."

### SOCIOLOGICAL

#### Laws Not Enforcible.

District Attorney Jerome of New York has been attacking the existing law for limiting the traffic in liquor at New York. He makes the statement that "where a large number of people in a community want to do an act which they do not believe to be morally wrong, a law prohibiting that act is practically unenforceable by judges and officers locally elected by that community." He declared that the Sunday closing laws of New York could not be enforced and that the Raines law had forced 2,000 persons in New York into keeping houses of prostitution, and yet the law was upheld on grounds of morality.

#### Women to Have a Clubhouse.

The New York City Federation of Women's Clubs has decided to buy, equip and conduct a \$500,000 clubhouse. It is to contain a gymnasium, Turkish baths, swimming pools, library, restaurant, etc.

#### A Hanna Memorial Book.

It is of interest to the public in general, and to all students of sociology in particular, that the last published words of the late Mark Hanna—namely, the article on socialism and labor unions in the February number of the National Magazine—are to be brought out in book form along with several other articles by Senator Hanna, together with an introduction by Joe Mitchell Chapple, editor of the National Magazine.

### Miscellaneous

#### Typhoid In Two Cities.

Following a thaw and breakup, the number of typhoid cases in Philadelphia increased at the rate of sixty new cases in a day, and fears of a general epidemic were created. Cleveland, O., was also threatened with a typhoid epidemic.

#### Accidents.

At least fifteen persons were killed and injured by the unprecedented collapse of the steel skeleton of an eleven story hotel building in process of erection at New York, Wednesday. Faulty construction was believed to be responsible, and the builders were arrested pending a rigid investigation by the city authorities.

Fourteen lives were lost on board the steamer Queen in fighting a fire during her voyage from San Francisco to Port Townsend. The dead include some of the crew. The craft was completely disabled.

The Wisconsin state capitol was destroyed by fire, Feb. 27, with a direct loss of \$1,000,000, not counting many valuable records. A special session of the legislature was called to provide a new statehouse. The fire started from a gas jet.

The propeller of the battleship Illinois was broken in collision with the Missouri during passage from Guantanamo to Pensacola, Wednesday, and was ordered to New York for repairs.

Several lives were lost and thousands of miles of territory were devastated by a windstorm and a prairie fire which swept over the counties of Kiowa and Comanche, in southwest Oklahoma, March 2.

#### Deaths.

Noah Baby, who claimed to be the oldest man in the world, died in the poorhouse near New Brunswick, N. J., March 1. Had he lived to April 1 he would have been 122 years old by his own record. Until a few months ago he retained memory of having seen and heard George Washington.

Edwin Freeman Dixey, one of America's most famous minstrels, died at Philadelphia, March 2, aged 60. He was the "bones" in the old Carncross & Dixey troupe.

## PUBLIC SALE REGISTER.

Sale announcements under this heading will be run until time of sale for 50 cents. Parties having their bills printed at this office receive notice free.

FRIDAY, MARCH 11:—Near Fillmore, Benner twp., Geo. G. Harlick, farm stock and implements—see complete description below.
