Table with columns: School, Teacher, Avg. for Term, Male, Fem., M., F.

On Monday T. A. Hosterman will open a term of summer school at this place. Parents who wish their children to advance in education should take advantage of these summer schools as all know that children who attend such schools far excel those who do not.

Monday afternoon an electrical storm of the nature of a cyclone, accompanied by loud continuous peals of thunder and hail, passed over this section and did much damage to timber belonging to A. Harter, J. Sanders, R. Harter, W. H. Grove and J. Gentzel, along the south side of Penns creek. Many of the trees were uprooted but some were broken and twisted off. About 700 square feet of the roof was blown from the large barn on the Gentzel farm owned by M. Eby, and about the same amount was blown from Andrew Harter's barn one mile west of this place.

WEST BRUSH VALLEY.

Hello! was on a furlough trip and just returned home some time ago. Some of the scribes thought the West Brush valley scribe was lost or went on his wedding trip; but it was not correct, the scribe did not do like the Central Brush valley or like the Hoy School scribe, the West Brush valley scribe is too sly for the other scribe. I will tell the reason why we didn't write for the C. D.—news was as scarce as hen's teeth.

On last Sunday morning a few minutes after 2 o'clock, while all our citizen were sweetly wrapped in the arms of Morpheus, the cry of fire "fire" broke on the stillness of the night and in a very short time a dozen citizens were on the scene of what might have been a destructive fire. It was the pretty residence of W. R. Potter that was on fire. The fire started in the cellar kitchen on the floor near the door leading to an alley and had burned through the top of the door and the fire was already climbing upward on the weatherboarding outside when it was discovered by Henry Parsons, who had been up Dix Run to see his father who is seriously ill. Mr. Parsons gave the alarm. Charley Eckenroth was the first on the ground and with a few buckets of water he succeeded in subduing the flames. The origin of the fire will no doubt, forever remain a mystery. It flavors strongly of incendiarism. Mr. and Mrs. Potter had gone to Fort Matilda on the 5 o'clock train and no fire was left in the stove. Ten hours after they had left, the fire broke out and had it had to minutes more of a start before discovery, Mr. Potter would have been houseless. And now Pat's mad because we didn't eat him. If its anything Pat likes it to eat and fight fire.

The entertainment given by our home talent in the Grange Hall on last Friday evening was all that could be expected, in fact it was more than was expected of them. Everyone played his or her part so well that the sharpest critic could find no fault. I would be glad to comment on each individual personally but have neglected taking notes and I am afraid I could not do justice to all. The Court trial was a very laughable affair and each one played his or her part to perfection. They realized about \$15 which will be applied to grammar school library.

At his home, in Union township, Wm. H. Smith, after several years of suffering, died on Saturday, April 8th, from various diseases incident to old age. Mr. Smith was for many years a resident of Unionville and was a carpenter by trade which he followed nearly all his lifetime. He was a consistent member of the Baptist church to which he belonged most of his life. He leaves to survive him his wife, three sons and two daughters, as follows: Mrs. Warren Cadwallader, of New Haven, Pa.; J. Calvin, of Unionville, Pa.; Jacob B., of Bellefonte, Pa.; Geo. W. Lucas, of Philipsburg, and George W., of Williamsport. His age was 50 years, 7 months, 2 days. Funeral on Monday 2 o'clock pm. He was a veteran of the civil war. Thus has passed away another of our oldest and most respected citizens and the most we can say of him is, he was one of God's noblest works, an honest man.

Mrs. George Moyer, of Loganton, died at the home of her son, S. G. Moyer, near that place Monday morning, 3rd, aged 79 years. Deceased had been in poor health for some time, but was not confined to her bed until Sunday. She is survived by four sons and three daughters.

Miss Annie Frantz is slowly improving.

S. E. Spangler is confined to his bed.

Arrived, at the home of Mr. and Mrs. Ira Shaffer, a boy on Thursday night.

GIRLS' OCCUPATIONS.

Uses to Which Radcliffe Graduates Put Their Education.

Light is thrown on the way girls put a college education to use nowadays by an examination recently made of the records of graduates of Radcliffe college, the women's institution affiliated with Harvard. Naturally it would be expected that young women trained as they are at Radcliffe, where the courses, teachers, examinations and general requirements for degrees are exactly similar to those of the men's big universities, would go into teaching or other professional work almost exclusively.

While it is true that a large proportion of the graduates still do this, there is nevertheless a considerable number who take up occupations of a very different sort. Most prominent of these, perhaps, are the former Radcliffe girls, who carry on a good share of the charitable work of great cities. The successor of Mrs. Rebecca Foster, for many years the "Tomb's angel" in New York, is Miss Ada Elliot, not long ago a student at the women's college at Cambridge. One graduate of Radcliffe is head worker at Hartley House, in New York city; another holds a similar position in the Neighborhood settlement carried on by students and teachers of Pratt institute, in Brooklyn; a third, who was graduated in 1895, is assistant secretary of the State Charitable Aid Association of New York, which has a kind of advisory oversight of all charitable and penal institutions on the continent; still another is at the head of the Friendly Aid House maintained by All Souls' Church in the metropolis.

There are also a few trained nurses among Radcliffe graduates, and some of the girls who have taken up secretarial work have shown marked ability. As a rule, commercial life does not seem to make a strong appeal to these college graduates. In fact, only one downright business undertaking appears in the records. That is a partnership between a former Radcliffe student and a girl friend from the same town in the south who started in Boston a laboratory kitchen where, as a beginning, scientific baking was done. This start has now developed into two very successful restaurants in the New England capital.
