Two Wellsborough women and their children were out driving last week one evening on the Tioga road. After standing in the mud for several minutes holding the horse's head, a man drove up and asked what was the trouble, and upon being informed, he told the ladies that the supposed auto head-light was in reality the arc lamp on Tioga street. They have later learned that their horse was in reality after all, not in the least afraid of automobiles.

#### PEACE CONFERENCE.

The Peace Conference at Portsmouth, N. H., soon to be held between envoys from Russia and Japan, is attracting world wide attention. Witte, the Russian representative, arrived at New York yesterday and in the course of a few days the interested parties will get down to business. Interviews given out from both sides indicates that neither are in a proper mood to reach a basis upon which peace can be declared. The Russians although badly worsted declare they will not accept terms that are humiliating. The Japs on the other hand claim that the war should continue as they want to capture Vladivostok and drive the Russian army further back in Manchuria.

#### REMEDY FOR HAY FEVER.

After Trying Other Treatments, Hyomei Was Used with Perfect Success.

J. F. Forbes, a well known Western railroad man, whose home is at McCook, Nebraska, writes "I have never had any relief from any remedy for hay fever, even temporarily, until I discovered the merits of Hyomei. I always recommend it when occasion requires."

There is no offensive or dangerous stomach dosing when Hyomei is used. This reliable remedy for the cure of all diseases of the respiratory organs is breathed through a neat pocket inhaler that comes with every outfit, so that the air taken into the throat and lungs is like that of the White Mountains or other health resorts, where hay fever is unknown.

The fact that Sidney Krumrine agrees to refund the money to any hay fever sufferer who uses Hyomei without success, should inspire confidence in its power to cure. A complete outfit costs only \$1.00 and extra bottles but 50c.

Many a man is a failure because the door of success won't open as easily as the saloon door.

#### THE PLODDER AND THE SWELL

You had better think twice, young lady, before passing up the plodder for the "swell" fellow. The plodder may be off a little in the cut of his clothes and may not shine at the party like your "swell" man, but he is saving his money and will come down the home stretch so fast that he will throw dust all over the other fellow. Poke fun at him now if you choose, but some day you will have to get a spyglass to see him, he will stand so far above you. The "swell" fellow treats you lovely now; tells you that you are pretty, dances buggy riding, you ice cream and takes you lovingly riding. Then he has shot his bolt. He is all in and the ice cream and buggy rides are a thing of the past. He may be lying around and living off your folks or his own while the plodder will be building a new house, buying another farm or two and planning to take his wife on a trip. The plodder in youth is a pretty good sort of a fellow to tie to. True, some of them remain plodders all their lives, but a majority of them eventually acquire speed. The "swell" fellow goes so fast when he is young that he has no wind for the latter part of life's race.

McNulty, of Chambersburg, Pa., that he will call a meeting of the supreme council to consider the protests against the recent legislation of the supreme council increasing the insurance rates of the order.

Mr. Wiggins wrote that he had already received 29 petitions from supreme representatives of different states and he is assured of receiving enough more to make up the 39 which require him to reconvene the council, as well as the required petitions from seven states. The time and place of the meeting are yet to be determined.

**How to be Lightning Proof**  
This is the season of danger from lightning. The Scientific American says if you are afraid of lightning, here is a safeguard to remember: Simply put on your gum shoes or rubbers and then stand up so your clothes do not touch anything. Whether you are indoors or out of doors, you are perfectly safe, for rubber is a nonconductor and you are completely insulated. This is worth remembering.
