papers, but in magazines and scientific journals.

## Plans for Sinking Money.

It now turns out that the Spencer seedless apple, so far as its being a new and valuable production is concerned, is an entire fake, and it would appear that the plan is more of a stock and bond selling proposition than a nursery stock raising one. The seedless and coreless apple is almost as old as history. Pliny, the Roman natural-ist, described it two thousand years ago. Hundreds of references appear in the books of horticulturists about this freak, the whole story having been described by Professor Bailey of Cornell about fifteen years ago. The bad faith of the Spencer apple people is shown in their circulating a partial quotation from Professor Bailey written about the seedless apple years ago, and having no reference to the so-called Spencer seedless apple.

The reason now appears for the care-ful educational work done among the newspapers last year. The Spencer Seedless Apple Company of New York has been organized with alleged nurseries in Niagara County, has issued a magnificent catalogue with a full col-ored lithograph of the "Spencer seed-less apple," and also showing cross sections of the apple with no semblance of

## Newspapers Which Bit.

This catalogue contains numerous extracts from papers all over the country lauding the Spencer seedless apple al-most to the skies. The truth is, that some of the most conservative papers were successfully roped in and uncon-sciously published articles specially written for them by the propagandists themselves, and these very papers are now quoted in the catalogues distributed by the company. Such eminent names appear as the New York Times, the Buffalo Inquirer, both of which had enthusiastic editorials, the American Inventor, the New York Farmer, the Scientific American, the Buffalo Commercial, the New York Heraid, the National Nurseryman, the Denver

### Times and a score of others. The Public to Pay the Profits

This New York apple company is but one of the subsidiary companies, with apparently the right to sell stock,

cern which this tremendous advertising is causing our principal competi-tors in the export apple trade. The Tasmanian government council has instituted an official inquiry whether this new development is likely to so revolu-tionize the character of the fruit which we export to Europe, and which is in competition with them, as to ne-cessitate their securing and growing this seedless variety.

Colonel Brackett states that thus far no tree or scion of this alleged remarkable apple has been placed in the hands of any disinterested experimenter, and it is significant that there are not as yet any trees or scions for sale, al-

rees are being grown in New York, lowa, Utah and Colorado. It is questionable whether the Fraud Order Office of the Postoffice Department will be able to bar the use of the mails to the company owing to the skillful preparation of its literature, though such action, it is stated, would be sustained by all reputable fruit men and nurserymen.

The wonder of the whole story is that in the face of such lamentable failures where the promoters have consented to exhibit their apples the work still goes forward of successfully fooling the people. It is not denied that there is an apple which may be called seedless and with an imperfectly developed core; but it is a freak and worthless, and, moreover, is thousands of years old. Wherever the Spencer "If not too young, skin them of years old. Wherever the Spencer apple has been exhibited it has been a fizzle. One claim made by the company is because the apple is bloomless it offers no opportunity for the codling much its agreement. Horrors! He misplaced the moth its law its every the mother than sposed and the answer read:

"If not too young, skin them thousands is a green soap, consistency of paste, a perfect cleanser for automobile machinery and all water, sprinkle plentifully with salt, and leave for a week in strong polished surface. Made from pure vegetable oils. If your dealer does not carry American moth to lay-its eggs, that, therefore, answer to "Anxious Housekeeper's" the apple cannot be wormy. One of the query for a pickled onion recipe. apples reluctantly submitted by the Spencer people to Colonel Brackett, the DEPARTMENT OF AGRICULTURE BY THE SPENCER COMPANY.

(No. 121) Beans, Peas and Other Legumes as Food. (No. 32) Silos and Silage.

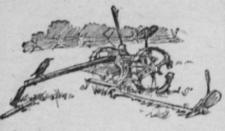

(No. 154) The Home Fruit Garden; Preparation and Care. (No. 33) Peach Growing for Market. (No. 34) Meats; Composition and

Cooking.
(No. 192) Barnyard Manure. (No. 200) Turkeys; Standard Varie

ties and Management (No. 214) Beneficial Bacteria for Leguminous Crops.

# Proper Seasoning of Farm Imple-

It is full time that all mowing machines, harvesters, and other horse implements should be left out in the field to obtain the benefit of the fall weather. Plows and harrows will, of course, be needed yet, and these will be kept under cover for awhile, but can be left out later after the fall plowing. This practice of fall weathering of implements is quite general in many farming sections and is encouraged from year to year by a large class of farmers. It insures thorough weathering of the wood and produces in the metal parts of the machinery

a fine brown color. The practice is an entirely satisfactory one to the implement sellers as a class.

## Pickles and Babies.

An exchange made an unfortunate error in its "Answers to Correspondents" recently.

"Fond Mother" wrote in to find out what she should do for her children who had the whooping cough. In the

### Everything Was the Same.

A young Oxford student one day received an unexpected visit from his prefty sister, and was very indignant that she came without a chaperon. "Look here," said the young man, "I will not have any of the fellows see you in my rooms, so if anyone knocks at the door you just get behind that screen."

In a few minutes a knock was heard, and the girl ran behind the screen as her brother went to open the door. An old gentleman stood on the threshold, who, after profusely apologizing for his intrusion, said: "I am just home from Australia, and many years ago I occupied these rooms; would you allow me, sir, to look at them once again?" "Certainly," said the student, "come in." "Ah." ex claimed the old man. "everything is just the same. Same old table, same old fireplace, same old screen." Then, catching sight of the girl; "By jove, same old dodge." "Sir, "exclaimed the student, "that is my sister." "Gad, was the rejoinder, "same old

## A Few Afterthoughts.

The Chinese women are being weaned from the old custom of binding their feet, and it is stated that the practice now obtains only among the

American women. There is no authority for the statement that the railroad companies would seriously object if Congress spends the entire session discussing the tariff and reciprocity.

"I reflect with sorrow over the justification of the claim you make of having lent me your constant support," says Lord Curzon, the viceroy of India, recently deposed at the instance of Premier Balfour. If the Premier understood just what Lord Curzon indicated, and had the nerve, he probably called back, "you'r anoth-

## A Trial by Telephone.

Robert Willard, a farmer living near Elkhart, in Logan county, Illinois, upon being arrested by Constable Pettit on a charge of intoxication and dis-orderly conduct, pleaded guilty by telephone. When he was informed of the \$14 fine by the justice in Lincoln, be agreed to send the amount by mail. The case is unique in central Illinois

jurisprudence.

The constable found Willard busily engaged in a cornfield and read the warrant to him. Willard agreed that it was all right, but pointed to the work that he was doing and declared that he could not possibly lose a day or two by driving to Lincoln and waiting for trial. He suggested the use of the telephone, and when the constable somewhat dublously acquiesced, the two repaired to the farmhouse. nally they got connection with Justice Rudolph, in Lincoln, and over the wire the unique trial was held. The justice received a letter later with the fine
