RISES TO POWERFUL AND COMMANDING POSITION.

Beginning With Gas Probings, Charles E. Hughes Develops Into Dominating Factor in Great Insurance investigations.

In the history of the stage it has happened more than once that an actor, not thought to be a star, but with sound qualities and training has accepted a part rejected by others, and by careful study and interpretation made it the most interesting portion of be ore the country to-day, there is an take," said he, as he doffed his hat with instance going to show that fortune for such fidelity is not confined to the a bow.

Ay r or so ago the New York leg-Greater New York, and the committee of thought. appointed for the work had some trouexaminer of witnesses. The task, for thief!" some reason, did not appeal to the prominent members of the bar who we approached, and the choice finally fell on a man comparatively unhe developed at once into a man of striking force, and performed his duties so well he earned the applause of The burglar dodged out of the door. ies so well he earned the applause of the whole State.

Probes Insurance.

New York insurance irregularities was ordered the committee decided upon legal counsel, and again difficulty was encountered in securing it. The man who had so satisfactorily served the gas committee was traveling in Europe, and at the moment could not be reached with an offer. The offer went begging for a few days, until at last a Brooklyn lawyer accepted. Upon his suggestion, however, the man abroad, who was really desired, was cabled on the subject and angaged to assist in the work. After the work began this assistant virtually became the leading counsel, and conducted the investigation, which was of national interest, in a way to merit and receive national applause. He has become one of the most conspicuous figures of to-

Man of the Hour.

the Republican candidate for mayor in recent municipal campaign, and had he been might likely have swept the city. He is now mentioned for his party's leadership in next year's gubernatorial campaign. He is likewise suggested for the presidency of the Mutual Life Insurance Company. And should he decline preferment in both of these lines, and decide to stick to his profession, he is assured of a vast increase over the practice than he enjoyed before.

All of which goes to show that it pays to do whatever you set out to do with all your heart and mind.

The American Spoke First.

The American in the corner of the English first-class carriage insisted on lighting his cigar. The indignant Brit isher in the other corner protested but protested in vain. At the next station he hailed the guard, with hostile intent; but the cool American was too quick for him. "Guard," he drawled, 'I think you'll find that this party here is traveling with a third-class ticket on him." Investigation proved him to be right, and the indignant Britisher was triumphantly ejected. A spectator of the little scene asked the American how he knew about that ticket, "Well," explained the imperturbable stranger, "the corner was sticking out of his pocket and I saw it was the same color as mine."

MAY BECOME A SENATOR.

Speculation as to Future of President Roosevelt After Term Expires.

When Mr. Roosevelt retires from the ffice of President of the United States he will be but fifty-one years of age and just entering upon his intellectual prime. Will he be content to go into retirement from politics? If so, he will have to forego his present love of doing Much, however, depends on If he shall be as popular when things. he retires as he is at present, or half as popular, he will remain the head of his

After his retirement from the Presidency, George Washington was given command of the army in our actual but nine terms he was in Congress the last eighteen years of his life than in all his previous political career. General Jackson retired from the Presidency in 1837, but he was the head of his party until his death, in 1845. He dictated his not declared war with France. John One of the adjuncts of the settlement is the Jane Club, an organization of self supporting young women who are making an effort to live up to the ideal offered them in the personality of their benefactor. The club is directly under the supervision of Miss Addams and every employe of the house, and in fact every one of the settlement, is responsible personally to her.

Miss Addams believes in the people, crusts them and looks to them for the proper disposition of their duties and their lives and in this way she has come nearer their hearts, nearer their confidences and nearer making them

King drove at once to the prison, and disregarding the warning of the official one and disregarding the warning of the official one and unary of locked the door behind him, and then reasoned with the convict.

It would have been a remarkable interview, even if the King had taken a pardon to the convict. But far from the Presidency in 1837, but he was the head of his party until his death, in 1845. He dictated his successor, and his will was law to both Van Buren and Polk. Van Buren and Polk in 1844 and defeated Cass in 1848. The proper disposition of their duties and their lives and in this way she has come nearer their hearts, nearer their confidences and nearer making them

House Committee's Action on Lighthouse and Similar Bills.

The House committee on interstate And so Mr. Charles E. Hughes is the subject of no little speculation. The obscure New York lawyer of the other day is a powerful man of this day. He is mentioned for both political and by the committee. It has been the nors. He might have been practice of the House to frame these Francis Goodwin, a philanthropic cit-

SCHOOL GARDEN WORK.

FEATURE OF THE NEWER EDUCATIONAL METHODS.

Horticulture at Hartford, Conn.-Teaches Gardening and Fruit Growing in All Its Branches.

There is much growing sentiment in favor of school garden work in all parts of the country. If agriculture is the backbone of the country, so agricultural education is the stem and fibre of successful farming. School garden work, as it applies to children who have never lived on a farm, is a start toward scientific agricultural education, and it is a branch of education of great importance in these times whon so many boys and 'ris are drifting toward the cities and away from the old farms. The tendency of

growing of plants, and there is no time like early youth to instil in the mind a leve of nature and of growing things. So that considerable success has attended the school garden idea and the nature study idea as it is being applied in a number of the older institutions and in some new special schools. A striking example of this is the School of Horticulture at Hartford, Conn.

In the year 1893 the Revetend

College, was secured as Director of the School of Horticulture. The buildings were soon erected, and the School established as the first public Handicraft AN IMPORTANT AND ATTRACTIVE School of Hartford. Besides giving apprentice work, and a course in horticulture and botany to the boys from the Watkinson Farm School, the folive Years' Course at School of lowing season a course in school gardening was established. This course was opened to the boys and girls from the city sc-ools.

The school garden work at the School of Horticulture proved attractive and popular from the first, and after one or two years of free work a tuition was charged for each person who took a garden. This tuition need not keep any one from having a gar-den, as 100 hours of work for the School pays any boy's tuition.

The school garden work has been systematized, until now there is a five years' course in school gardening for boys and girls, as well as one to train public school teachers, and one course for adults which is largely taken by clergymen of the city.

One of the reasons which has made this work so popular is because of the fact that the school shows results. Every boy here, every person, for that matter, who has a garden gets a great deal more in value from his garden than the price of the tuition.

The first year the boys begin their garden work the 1st of May. They come out for a lesson one day a week. They come into the classroom, where each boy receives a notebook, marks his own attendance, keeps a weather report, and writes down from dictation, or copies from the blackboard, a detailed lesson for that day. the seeds they are given, they then pass with the instructor to the toolroom, where each boy receives his tools, and with these he goes to his garden, where an instructor is always pre.ent to explain the things which he learns in the classroom. In going to his garden he passes by the observa-tion plots, which are studied.

The second year the boys begin in March, taking up the mixing of the soil, potting and repotting the tomato. pepper, and egg plants that they have in their gardens.

The third year they begin in February and take up root-grafting, cutting, pruning, spraying, digging and setting trees, spading and caring for grounds. as well as the garden lessons.

The fourth year boys begin in Jan-uary and take up the making of hotbeds, management of hotbeds, prunspraying, soil analysis, plant foods, testing seeds, planting the gar-den, besides the garden lessons, and in the autumn they have budding fruit culture, and asparagus culture. atic study of the soil, beginning in

All gardens continue until after the 1st of October. That the gardens pay is best shown from a record of the garden yields during the past summer. A first year boy got \$9.66 worth, a third year boy \$25.64, a fourth year boy \$23.03, and one of the clergymen \$17.21 worth of

produce in the gardens. The first year the gardens are 10 x 30 ft., the second year 10 x 40 ft. the third year 10 x 60 ft., the fourth year 10 x 80 ft. The clergymen have gardens 10 x 40 ft. Public_school teachers have gardens 10 x 30 and 10 x 40 ft.; the plan is to give them a practical training in the method of training school children in the work Already several schools of Hartfor have established gardens in connec-tion with the schools, and the School of Horticulture is furnishing instructors of late; those that are giving instruction were trained at the School of Horticulture. But there is another thing that the school does. It keeps the children occupied during the summer months, keeping the boys and girls off the city streets; because they come to love their gardens and come out to work in them, and to work out their tuition. This is not all, as soon as the planting is done in the gar-dens the children take up the systematic study of weeds, they become familiar with them and learn methods of destroying them. Also at the School there are about 500 observation plots containing many of our common things, and the children learn to know them in all stages of development. People are beginning to realize that a boy from the School of Horticulture is better to work in their garden than the average man they can get, bepensive seedlings as the men so often Frequent calls are made upon Mr.

Hemenway for a boy to take care of
