A Strenuous Life.

Chesapeake Bay lead a strenuous existence. They "turn out" at 6:30 o'clock in the morning and after half an hour allowed for dressing, report for drill which continues for forty-five minutes ere the call for breakfast is given. From 9 until 12.30 o'clock there are periods of study and recitation, then half an hour for recreation before dinner, which is served from one to two o'clock. In the afternoon there is more study and recitation with forty-five minutes' drill. Half an hour before supper and one hour after supper are allowed for amusement and then from 7 to 9 comes another study An hour of "skylarking" closes the day and the cadets turn in

at 10 o'clock. During the three year interim the ernment, etc.

BALDWIN'S NEW AIRSHIP.

Believed by Experts to Surpass any Flying Machine Yet Constructed. Captain Thomas Baldwin believes

he has found a way to navigate the air with fair success. Captain Baldwin, be it known, is America's foremost Social Events a Feature of This aeronaut, having been engaged in the Governmental School.—Daily Re-profession of sailing to the clouds profession of sailing to the clouds longer and more continuously than any other citizen of the republic. He began ballooning in the ordinary way nearly a quarter of a century ago. Then he invented the modern type of balloon type of airship.

In the past half decade Captain Baldwin, who makes his home in Los Angeles, California, has built five different sky craft, all on this general pattern, but each different in many reto improve on even the new airship which has recently been completed, ing of trees upon barren prairie lands. but the fact remains that this latest flying machine is so far superior to everything that has gone before it that it is well worthy of notice.

In the new airship the gas bag or which Captain Baldwin exhibited at the St. Louis Exposition. It is made of Japan silk, oiled inside and out. From this bag there is suspended by means of a net of cotton seine twine a framework which contains the propelling and steering apparatus of the airship and which is known as the In Captain Baldwin's earlier inventions this was built of steel tub-

A Powerful Little Engine.

The engine which furnishes power for driving the baloon is located about midway on the keel. It consists of a use on motor-cycles. The motor October to May.

The pay of a cadet is \$500 a year and a ration of 30 cents a day, out of which allowance he is required to purchase uniforms and textbooks and meet his mess expenses. The sum of \$10 per month is also withheld from the pay of each cadet in order that

the pay of each cadet in order that Attached to the keel at the forward upon graduation he can purchase the end of the airship is the propeller, uniform and outfit of a commissioned which is eleven feet in diameter and receives a commission as a third lieutenant in the Revenue Cutter Service rate of two hundred times per minute, at a salary of \$1,400 per year. Three promotions will bring him to the rank peller is at the forward end of the ship of captain with \$2,500 salary per year instead of at the stern, where it might and an increase of ten per cent. for naturally be looked for, and this gives the keynote to one of Captain Baldwin's most important inventions, namely, the scheme of having the rap-The cadets at the training school on idly revolving propeller pull the ship through the air instead of pushing it as a ship is pushed through the water.

Nearly fifty feet from the propeller, at the other end of the keel is the rudder by which the steering is accomplished. This rudder is about six by eight feet in size and consists of canvas stretched upon a wooden frame. Attached to the framework of the keel is also a tank which is capable of holding two gallons of gaso-line. The navigator of the new Baldwin airship has nothing in the way of a platform on which to stand, but must balance himself on the skeleton framework of the keel, bracing himself by means of the net which suspends the keel from the gas bag.

Baldwin's new airship cost him more future Revenue Cutter officers acquire than \$1,800 and by reason of the gas a wide range of book learning includ- required to inflate it as well as other mathematics, English, history, expenses, each ascension costs in the law, hygiene, seamanship, engineer- neighborhood of \$250. MADAME BERTHA KALICH

ing of the Russian plays.

ough schooling on the American stage, the requirements of which are far different from those of the Russian, she will become famous, for she comes of a race which has achieved wonders. And when we encounter marked talent in the Hebrew race no one living can predict how many rungs of the ladder of fame may be traversed successfully. The greatest actors, not only of the present age but of the past, have been and are Jews. Of the women we have from Rachel to Bernhardt, and the men range from Dawison to Edwin Booth, while passing reflections may be given to the ability of David Garrick, Mrs. Siddons and a host of others in whose veins were some drops of Oriental

Bertha Kalich's appearance in Chicago was greeted with an outburst of enthusiasm which continued throughout the many weeks of her performance there. Such a well-known critic as W. H. Hubbard of the Chicago Tribune in reviewing "Monna Vanna" and its ding actress, said, "Madame Kalich Indians and trappers. is enrolled in the list of great artists. She is now an actress of peculiar and uncommonly attractive qualities and gives every promise of becoming in a few seasons one of the most notable women on the American stage. Watching her during the week has brought conviction that she is the post of remarkable talents and that these talents are susceptible of a developing and shaping which can but place her high in the esteem of a large class of the best theatre-goers and add another great artist to the small list of

So far this is the story of Monna Vanna | Indians, or such of them at least as for the American people are not ac have any business ability. Critics lay gents make it their business during the great faith in her possibilities as an winter to do nothing but buy furs of actress. They believe that after thor. the Indians, selling them later at a

handsome margin of profit. These agents usually travel from reservation to reservation by dog team or snow shoes.

Even the little weasel, scores of which daily leave their tiny tracks in the snow on the outskirts of the towns are worth \$1 each for their pelts. They were valueless three years ago. and two years ago were worth 10 cents each. For a time last winter the pelts brought 50 cents each. The weasel also belongs to the homologue of the American sable together with the marten, mink, fisher and otter. The American sable really is the marten, according to some authorities. It is commonly called the pine marten, and at first glance the only distinguishing feature between it and the mink is a spot of beautiful orange color on its throat, just under the chin.

A grizzly bear skin is worth \$40, if

in the best condition, but of course grizzly bears are unknown in the Lake Region. Many black bears are trapped and shot, however, by settlers,

Woman's Sweet Will. On a pillar erected in Canterbury, appears the following:

really gifted players that our stage can boast. She has the power indispensable to any artist who is to endure and whose work is to be of any wide reaching influence—the power to attract the public.

When Eve brought wee to all mankind Old Adam called her wo-man.
But when she woo-ed with love so kind, He then pronounced her woo-man.
But now with folly and with pride, Their husbands' pockets trimming, The ladies are so full of whims.

The people call them whim-mea.

"Where is the man who has the power skill
To stem the torrent of a woman's will;
For if she will, she will, and you may depend on't.

And if she won't she won't, and that's the end on't."
