of the country. During the past ten years observers culture, (then the assistant in charge of the Weather Bureau have appeared of cereal investigation.) He was sent with records in court nearly three there by the Secretary of Agriculture thousand times. Evidence as to the in order to gain all possible information weather is a great factor in a variety in regard to macaroni wheat and to of cases, both civil and criminal. Civil select such varieties as would probably cases are largely personal injury, dam- succeed in the great grain regions and age to perishable goods, as by freezing especially in semi arid portions where or rain, and loss by fire. The criminal the ordinary bread wheats were sometrials. In most cases claims for dam- Mr. Carleton made a thorough explora- While the possibilities of the crop of ages are almost always settled outside of court, information as to the existing weather conditions having been secured by both sides. As a usual thing when an Micial of the Weather Bureau appears in court with records to give testimony, he does not know the character of the suit on trial, for it is generally arranged by the attorneys to put him on the stand immediately upon his arrival in court and he is excused after his testimony has been given.

An observer of the Weather Bureau was once called in a case in which the plaintiff had stated that while she was riding in a street car she attempted to shut a window in order to keep out the raw cold weather. As the car reached a curve she was suddenly thrown headlong into the street. The railway introduced the weather record to show that on the date of the alleged accident the weather was warm and sunny and there was no occasion for shutting a window. The wind records of the Weather Bureau are valuable during trials involving damage by wind, such as blowing down of buildings, super structures and flag staffs, the wrecking of vessels on the lakes and ocean etc., and seldom is a suit for damage caused by high wind brought varieties. In the Russian provinces at this time, estimates run from 25,000any of the large cities that the Weather records are not called into home of the best of macaroni wheats, comparatively new crop in the United brought out five broods of fifteen or so,

Evidence is sometimes desired in a case of damage by lightning. Several years ago a building in Illinois col- bushels of the best varieties of wheat States is now exporting annually about diet. A rain storm overtook them, lapsed during a severe thunderstorm. It was insured by loss against lightpartment of Agriculture distributed to and other European countries, for it disconsolate over his loss and while owner claimed full insurance on the increasing the stock. The crop secured, there that the American grown wheat together with two fresh importations, house was caused by a bolt of light-was distributed in 1901 to the farmers retary Wilson stated that the value of the first was distributed in 1901 to the farmers retary Wilson stated that the value of the first was distributed in 1901 to the farmers retary Wilson stated that the value of the first was distributed in 1901 to the farmers retary wilson stated that the value of the first was a bushy broad of woodland raised. hands of the adjuster who in turn ment stations of the various states. in charge of one of the principal weather bureau offices, to whom by mutual consent the decision was left.

No Mud on His Boots.

The subject of rainfall was important mear by in a stable. A thunder storm with heavy rain prevailed at that time and shortly afterwards the officers who had been summoned put the coachman under arrest. He denied the cess os the ordinary bread wheat. man under arrest. He denied the charge and called attention to the fact that his shoes were not wet and muddy. During the trial the Weather records were produced showing heavy rain at content, the time and the jury concluded that it was case of mistaken identity, and employed in the cultivation of macathe man was discharged.

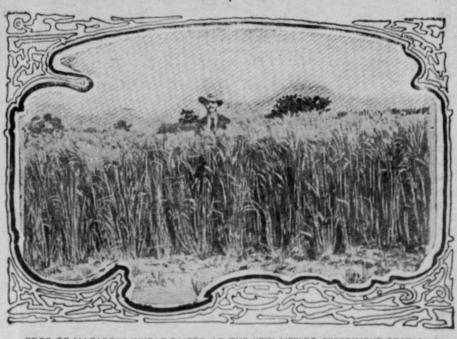

Saved His Life.
