WOMAN PHILANTHROPIST WOULD PREVENT UNNECESSARY DIS-TURBANCE OF SICK.

Mrs. Isaac L. Rice, a Wealthy New Yorker, States that Half of the Yast . Mubbub Raised by Boat Whistles is Useless.

Mrs. Isaac L. Rice is one of the few rich and influential women of New York who is constantly looking after the needs and comfort of those less fortunate in the awarding of the world's goods than herself.

Mrs. Rice is a philanthropic woman who has never permitted her wealth comfortable surroundings to and blind her to the want and suffering around her and has recently been making a strong effort to have at least one nuisance abated-a nuisance in one sense and a menace to many lives.

This is the constant and, as Mrs. Rice declares, the unnecessary blowing of whistles and signals in New York harbor. Night and day these ear splitting whistles and sirens can be heard for a distance of thirteen and a half miles over the city and through careful investigation Mrs paralysis of the heart follows. My Rice has found that hundreds of in- treatment is curative and eliminative. valide in hospitals and nervous wo- In the first four days of the disease. men in homes are driven almost to prescription No. 1 increases the iron distraction.

### A SCARLET FEVER CURE.

Big Success Claimed for Remedy by Dr. Luhan. 1

A new treatment for scarlet fever which, he says, has had a long series of victories and no failures in its strug gles with the disease for nearly eight years, is now offered as a free scien tific contribution to the medical profes sion by Dr. J. F. C. Luhan, of East Seventy-second street, N. Y. Noticing that most deaths from the disease were the result of paralysis of the tion. heart, he devised a treatment for the blood and for the kidneys which prevents anaemia-or destruction of the

red blood corpuscles-and also prevents kidney complications. -The physician in speaking of his treatment, said:

"As to my treatment. The germs of scarlet fever diminish the red blood corpuscles. - Anaemia next sets in through the poverty of the blood, and in the red blood without impairing The

FAVORS FOUR-YEAR TERM.

BELLEFONTE .PA. THUREDAY, APRIL 19, 1906.

BOURKE COCKRAN DECLARES IT WILL INCREASE EEFICIENCY OF THE HOUSE.

Under Present Two Years' Verm. He Says More Time is Speat in Looking for Re-Election than in years ago. Law Making for the Nation.

Bourke Cockran, of New York, who has introduced a constitutional amend ment making the term of office of a member of the House four years, instead of two years, as at present, be lieves that such a change from existing conditions would be all that is essential to establish the predominence of the House over the Senate, if the House only saw fit to exercise the power lodged in it by the Constitu-

Discussing the subject recently, Mr Cockran said:

"There is but one change, one amendment, that, in my judgment, could possibly increase the conse quence or capacity of the House to defend itself, and that will be simply the question of the term of a member. I am perfectly willing to admit that, as at present constituted, where a member is chosen for two years, we are placed in the position that just as soon as a member takes his seat in Congress and begins the discharge of his duties he is at once thrust in the throes of a contest for re-election.

### and important industry. Peocarne milles to see the wonderful forges, the showers of sparks flying

from beneath the heavy hammers, and to listen to the din of the thousand workmen. Silas Howe lived to be a millionare and he did a great deal of good with his money. Squares are still made on the spot where the first one was thought out more than ninety-five

Ras Makonen, s

CHICAGO OF THE SOUTH.

ATLANTA FAST BECOMING CREAT INDUSTRIAL AND DIS-TRIBUTING CENTRE.

Story of a Northern Man Who Went to Georgia and has Nearly Over- he begins in time. The West is full turned Old Southern Methods-Is of men who have done it, and then One of a Type.

BY WILLIAM E. SMYTHE. Atlanta is the Chicago of the South, -except that some of the people of that enterprising city put it the other way and tell you that Chicago is the Atlanta of the Middle West. In either case, the point remains the same. And

Georgia. But as I read his story, as he has set it down at the request of his Southern friends, I conclude that any country would be good for him which furnishes an opportunity for empire-building, and that he would languish in the best climate if there were no big things to which he could set his hand. Here in his own words you may see the true spirit of the empire-builder: "Natives of old settled parts of the world fail to understand the irresistible attraction of new countries, to men of energy, self-reliance and force. Such persons are really and truly

creators. They make meadows of swamps, create farms from wilderness, establish citles where commerce demands markets, build court houses and churches, found schools and colleges. Everywhere they go, they carry the seeds of civilization. This work of creation goes on indefinitely. No matter how rapid the growing there is constant additional work to be pushed on in a new country."

That is the idea in the abstract; Mr. Hunt has shown what it is in the concrete by building a railroad, establishing a cotton mill and a bank, and inaugurating other commercial enterprises. But this is not his greatest contribution to Southern progress. Any man can do those things if he has capital or can command it, but there are other things which can only be done by the man who possesses faith, indomitable perseverance, and genuine interest in humanity.

### Became a Live Stock Builder.

When Mr. Hunt went to Georgia the live stock interest was in a low state.
