

LOCKS UP HER HUSBAND.

The Marchioness Townshend and Her "Ten Per Cent Lord." The report that the Marquis of Townshend has been restrained of his liberty and confined in his own house by his wife recalls the peculiar circumstances under which he was married less than a year ago.

THE MARCHIONESS TOWNSHEND.

city made up of neither aristocracy nor true society to snub a member of the royal family."

While in this country he became engaged to a woman of dashing appearance who was supposed to have wealth and social standing, but when it was discovered that she had neither the wedding was called off.

This agent introduced him to Miss Gladys Ethel Sutherland, daughter of an English barrister and a young woman with a beautiful face and figure and lovely auburn hair, who is addicted to writing poetry about spring.

BENJAMIN F. BARNES.

Assistant Secretary to President. Who is Criticized by Tillman.

Benjamin F. Barnes, whose appointment as postmaster of Washington is criticized by Senator Tillman, has been assistant secretary to President Roosevelt for several years, and it was he who ordered the ejection of Mrs. Minor Morris from the White House.

BENJAMIN F. BARNES.

Senator Tillman made this incident the subject of a fiery speech in the senate, and he filed charges against Mr. Barnes, accusing him of unmanliness and brutality, when the president nominated him to the postmastership of Washington.

MME. ANDREIEVA'S CASE.

Strange Situation Caused by Visit of Maxim Gorky.

The case of Maxim Gorky, the Russian author, and Mme. Andreieva, the handsome actress, whom he introduced in this country as his wife, is almost stranger than the strange fiction from Gorky's own pen.

MME. ANDREIEVA.

stood the relations existing between him and Mme. Andreieva, but nevertheless was devoted to him. She showed this devotion after Gorky's arrest in January, 1905.

Stranger than all this, however, is the story that there is today a provisional republican government in Russia, that through it Gorky obtained a divorce from his first wife and that both are bound by oath not to reveal the facts.

Girls and Their Clothes. One of the things that many mothers teach their daughters and seem to regard as one of the paramount virtues is that every garment must be put carefully away as soon as removed.

Often as a girl I spent the night with some friend after a ball and the dress and gloves were put carefully away in a clothes chest or wardrobe.

You will find your garments far fresher and more hygienic if you will spread them out, inside exposed, in an empty room for at least twelve hours before putting them in their places.

PAINS IN THE BACK.

Are the signs of the deranged Kidneys. And as the Kidneys are the most important organs in the human body except the heart, and have more work to perform than any other of the organs, these first symptoms of approaching disease should be heeded.

Krine's Kidney Pills are a specific for Kidney and Urinary troubles and will cure quickly by supplying that which Nature lacks, thus assisting nature in its important functions, of filtering the poisons from the blood.

HOUSEHOLD LETTER.

Suggestions For Spring Housecleaning, Refitting and Refurnishing.

March really belongs to the winter months with its snow storms and blizzards, but April brings spring weather and the thoughts of all good housekeepers turn toward the tasks peculiar to this season.

In spite of every care, furnace fires have left their traces on walls and woodwork, while draperies have been hung on sufferance for the past few weeks undisturbed only because the time for taking them down, cleaning and storing them away was so close at hand.

Up-to-date women clean house after a different fashion from the topsy turvey method—or lack of it—that made the family so uncomfortable, and furnished a stock subject for the wit of the funny newspaper man.

Pictures, ornaments and furniture are all taken out, cleaned and polished and shut into another room ready to be replaced when walls, woodwork and floors have been renewed according to their needs.

Sanitation and good taste and fashion agree in endorsing floors of hardwood, well finished or covered with the new "Crex" carpet, which is woven of sweet prairie grass with a cotton warp after the style familiar in the old time rag carpets, which by the way, are also fashionably used in the most expensive homes.

Wool carpets, even if badly worn, can be made into very pretty rugs at small expense and this is the only form in which they should be allowed in the home. Rugs can be taken out doors weekly and beaten and cleaned in a way that assures the comfort and health of the household.

Draperies and blankets should be washed in clear water made soft by borax with the addition of a moderate amount of pure soap.

Picture frames of gilt can be brightened and made to look like new by brushing with the following mixture, after it is cold.

To clean bronze use hot water and soap suds, dry quickly with soft linen cloths and polish with the sweet oil and turpentine mixture, recommended for furniture.
