Dig up a Weed by the Roots to Kill it. Most of the diseases which cause suffering and death are rooted directly in the blood. When there are impurities or poison in the blood some or all of the various organs are bound to suffer. It is almost impossible to be sick when the blood is rich and pure. Vin-te-na will clear and enrich the blood. It cures skin diseases, rheumatism, catarrh, etc., by going right down to the very roots of these troubles and eliminating every atom of disease-producing poison from the blood. Vin-te-na long ago passed the experimental stage. It is now a regular stand-by. It has cured so many cases where bad blood was the cause that anybody who knows it, knows it as a certain remedy. Does Your Heart Beat

Yes. 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Poisonous substances are then absorbed into the blood, instead of being removed from the body daily as nature intended. Keep the bowels open with Ayer's Pills, liver pills. All vegetable.
