HETTY GREEN'S SON.

"He's a Smart One" and is Now a Railroad President.

Edward Howland Robinson Green, who was nominated by the "Reorganized Republicans" for governor of Texas, but declined to run, is the son of Mrs. Hetty Green, the richest woman in America. He is president of the Texas Midland railroad, and his mother says, "Ed's a smart one." He did not become president of a railroad without working hard to attain that rung on the ladder of success, despite his mother's influence in the financial world. When he graduated from college in 1887 his mother asked him what he wanted to do.

"Well, mother," said the young man, "I think I would like, first of all, to take a vacation and have a good time. About three months would be enough, I think." The latter asked him how much money he would need for his expenses while resting, and he replied that about \$1,000 a week would suit him. She turned to her secretary and told him to place \$12,000 to young Mr. Green's credit. The latter started out to enjoy his vacation, and for twelve weeks Mrs. Green saw or heard nothing of her boy. On the last day of the last month young Green returned to his mother and reported himself ready for work. On this occasion Mrs. Green did not consult her son's wishes as to just what employment would suit him.

"I want," she said, turning to her clerk, "those papers about the Connect-

EDWARD H. R. GREEN.

icut road." The clerk passed over some folded documents. She selected one from the bundle and gave it to her son. When he examined it he found that it was an appointment making E. H. R. Green the foreman of a railroad section gang in Vermont. As a compensation for his labor in this aesthetic occupation Edward was to receive \$45 a month. He did not chew his pill. He swallowed it and struck out like a man for his job. A tough job he found it. His section was one of the roughest on the road. The drop from \$4,000 a month spending money to \$45 a month wages was a rather difficult matter to adjust, and at the first month's end he was \$40 in debt. He wrote to his mother for a remittance, but she didn't remit.

One day Mrs. Green rolled along in her private car and stopped for a chat on the roadside with Ned. She was favorably impressed with his progress and that night promoted him superintendent of the division at a salary of \$100 a month. He proved himself so capable a railroad man that when Mrs. Green bought the Texas Midland she made him its president.

GREAT STORM IN FLORIDA.

The great storm that raged along the lower coast of Florida on the 18th, resulted in upward of 100 killed and wounded. A paper sent to the Democrat from Miami, in its account of the hurricane, marks the story of two Centre Co. men, who went through the terrible ordeal. It is as follows:

In speaking of the wreck of quarter-boat No. 4, Messrs. V. I. Walker and Ralph Hartman, two of the survivors, reaching here today on the Miami said:

"We broke our moorings at 5 o'clock in the morning and were blown southwest. We put out two anchors. One of the cables broke, but the other held. It dragged, however, and we passed through the piling along the shore and went on the reef five or six miles distant. There the anchor held for a few minutes when it broke loose. The seas were running mountain high and three crew members broke over the craft in succession. From sixty to seventy were killed and crushed as the upper parts went off. Engineer Parlin was one of the first to meet death. The craft then broke up and men clung to whatever wreckage they could get hold of. One by one they would wash off and disappear. The piece we were on contained at one time fourteen men; there were thirteen of the number still clinging to it when we were rescued; but one had failed to hold on.
