A Baking Hint. Did you know that a common iron spider is a fine baking pan for many things? If you want a perfectly round cake that will rise high without running over and bake perfectly, try baking it in an iron spider. The thickness of the iron prevents the cake from burning on the bottom, and you can lift the spider by the handle much easier than you can handle a cake tin. This may sound old fashloned, but if you try it you will never bake your round cakes in anything else. Then, if you want a good thick ple of a "Brown Betty," there is nothing better than the iron spider for this. ## WE ARE PROUD

Of the fact that we have the best line of good all solid serviceable Children's Shoes ever brought to Centre county. On account of the great advance in the price of hides, leather and Shoes, and knowing that the market was full of shoddy goods, we were very careful to select our line of Children's Shoes so as to give the trade good value. The Shoes that we speak of are not cheap shoes for it is impossible to get good shoes cheap. They are shoes that are made of good leather; shoes that will stand the rough useage that a child generally gives them. We have a full line of the Educator shoes for children. These shoes are

good and wide in the toes and with low heels. This shoe is the best thing ever made in the child's shoe to save their feet from corns and bunions as is usually the ease after they

Our object in writing this advertisement is to impress on your mind two things: First-that the line of Children's Shoes that we will sell you will be just as we represent them and you will not be deceived. Second-that they are not cheap shoes for the concern who advertises that they have good cheap shoes, now cannot make good their statement for with the terrible advance in hides and leather it is impossible to get them. Now if you are

LOOKING FOR GOOD SHOES COME TO US

and if you are looking for poor shoddy shoes it is not the place to come. We tell you just what you are getting and do not misrepresent.
