Two Clever Builders of Aeroplanes.

the German government to building of a fleet of airships is a sig- promises that trains shall run at high nificant achievement. According to the subject than Professor Alexander Graham Bell, it means that the era of wide, permitting of much more conpractical aerial navigation has now one of mere theory and experiment. to the present system. He promises "The impossible has been passed in aerial navigation," said Professor Bell not long ago on learning of the success- the single rail or cable perfectly deful flights of the Wright aeroplane, spite differences of load and the tenden-"and I am proud of the fact that America leads the world in that matter." At the time of this remark the Wrights had demonstrated the practicability of their machine, but had made no contracts for the construction of a fleet. They were negotiating with the French government, and it was supposed that France would have the honor of launching the first vessels of the Wright design. It was reported that France had an option on the invention of the Ohio men, but for some reason the negotiations were broken cy to fall earthward, due to the law of off. It is said that the brothers submitted general plans to the government | the strength of the performances of guaranteeing a flight of fifteen miles his miniature engine, or model, which and asking for \$200,000. The height of is six feet long and powerful enough flight guaranteed was only seventy- to take his little daughter on trips upon five feet, according to report, and as a monorail line constructed around the French government considered a his private estate in New Brompton, height of 900 feet essential for war Kent. It has also carried easily a man purposes it declined to give more than weighing 140 pounds. \$40,000. The Wrights left Paris for Berlin a short time ago to arrange for the gyroscope locomotive, was recently the construction of a number of airships, and it is understood they will be paid \$10,000 by the German government for each ship built by them. They it would ultimately work a revolution ment to Siberia. Nevertheless the purchased in Paris several light motors of twenty-four and forty horsepower.

The Wright machine is a gliding machine. There is no dependence on balloons in any form. The craft is built to operate on the heavier than air principle and to overcome the law of gravitation by the resistance to the air caused by rapid flight and the broad surfaces presented by the wings of the

re beneficial than walking.

The Canadian Bankers' association, which includes all the chartered banks, has decided to compete against the express companies for money order business throughout Canada.

The official bank rate at Lisbon has remained at 51/2 per cent since January, 1899. The official rate at Madrid has been 41/2 per cent since September, 1903, and at Rome it has been 5 per cent since September, 1904. "To attract subscribers," remarks the

Temps of Paris, "Germany has not hesitated to put out a loan whose rate of interest, allowing for the repayment at a slightly higher price within five years, nearly reaches 41/2 per cent. Here is bona fide competition in the field of great state loans. This German loan has been subscribed fortyfive times over."

Law Points.

The power of the board of managers of a building and loan association to transfer to another association the contract of a borrowing stockholder is denied in Cobe versus Lovan (Mo.), 4 L. R. A. (N. 8.), 439.

A statute permitting arrest for fraud is held in Ledford versus Emerson (N. C.), 4 L. R. A. (N. S.), 130, to apply when by reason of the character of the transaction or the general termination of the partnership dealings an notion at law will lie against one part-

Rev. Anna H. Shaw, noted woman lecturer and president of the National Woman's Suffrage association, is building a handsome home for herself at Moylan, Pa.

Mrs. Collis P. Huntington of New R. York has purchased the Paris house of the late Baron Hirsch in the Avenue Gabriel. The price is said to have been \$600,000.

In her ninety-sixth year Mrs. Elizabeth F. Gillis of Milford is the oldest person in town and one of the oldest in Massachusetts. She has been a teacher for the greater part of her life

Mrs. Roosevelt has chosen to ally herself with that part of society which goes in for uplifting. She has sedulously avoided the merely frivolous. Her name is on the list of patrons of art and music. She is pledged when her husband leaves office to aid in the establishment of a national academy of art and of a national conservatory, both to be supported by government funds.

Mother Stewart, the founder of the W. C. T. U., recently celebrated her ninety-first birthday anniversary. She was postmistress under General Jackson, the first woman known to hold a federal office. She was the first woman to ask for police matrons. She began the temperance crusade in Springfield, O., in 1873, singing and playing in the saloons. She has written four books, the last one in her eighty-ninth year.

Soiled Book Covers.

Books with delicate bindings which have become solled through much handling can be satisfactorily cleaned by rubbing with chamois leather dipped in powdered pumice stone.

Stockings.

Stockings were made by machinery much earlier than is commonly supposed, a frame for stocking weaving having been invented in England by Rev. Mr. Lee of Cambridge in 1589. The stocking making machines are now almost absolutely perfect, receiving the yarn, starting the stocking and turn-ing the heel and too complete.

Snakeskin.

When the snake sheds his skin the skin of the eye comes off with the rest. Translucent in most parts, the skin over the snake's eye is perfectly transparent.

THE WRIGHT AEROPLANE IN FLIGHT.

aeroplane. It is self lifting and self propelling, the power being supplied driving forward, and the vessel is guided by a rudder. It may be manipulated so accurately as to sall in any deprone upon his face. Gasoline enough may be sustained.

neighborhood of forty and are sons davit was an editorial paragraph which of a bishop in the United Brethern church. They were in the blcycle business at the time the blcycle was a craze and have been experimenting with flying machines since about 1900. They early determined upon the aero plane as giving the best chance of successful flight and in 1903 succeeded in making a machine which would fly. Since then their efforts have been given to improving their machine and overcoming practical difficulties. The first flight lasted only fifty-nine seconds, but during it the aeroplane advanced a distance of 852 feet against a twenty mile an hour wind. The next year the brothers accomplished for the first time the feat of describing a circle. By the latter part of 1904 they had succeeded in flying as long distances as four miles at a time. Most of the experiments were made over meadows near their home at Dayton. They kept their aerial operations as much in the dark, so to speak, as possible in order to protect their discoveries and inventions from appropriation by others and often made their flights at night. In the latter part of 1905 a flight of twenty-five miles was made at a rate of nearly forty miles an hour. The accompanying picture from a photograph reproduced in the Scientific American gives a general idea of the Wright aeroplane. Heretofore the brothers have been very secretive about their invention and have avoided publicity as much as possible. Now that their work has been crowned with success and the stamp of approval has

been placed upon it by a powerful European government and with their financial future assured by the action this government has taken there is reason to expect from the courageous and persistent inventors greater freedom of utterance in respect to their ideas and anticipations.

At Wisconsin.

"Men," said the coy maid to a fond fusser, "are a delusion and a snare." "It is queer," murmpred the man, "women will hug a delusion." And while the coy maiden faintly protested the fond fusser set out to be snared .-- Wisconsin Sphinx.

household word, his works are among the books in special demand at the libraries, and incidentally the contro-

versy the president's criticisms provoked has added considerably to the gayety of the nations. One of the by a gasoline motor. Greek Church Functionary In Russia Who Is Friend of Douma.

According to letters written by the late Constantine Pobedonostzeff, procurator general of the Russian holy synod, it was this religious functionary who prevented the late Emperor Alexander III. from granting a constitution to Russia. But Pobedonostzeff is dead, and the most influential personage in the Russian church now is Antonius, metropolitan of St. Petersburg, who is described as a strong friend of the douma. It is said that he has bent every effort to prevent a break between the czar and the douma and to thwart the designs of the reactionary party at court. He has been characterized as one of the great men of the Russia of today and because of his personality
