Seeing that he was up against a stiff proposition he tried to keep them in the middle of the road but they turned and the tongue struck the large electric light pole on the north side of the diamond. There was a crash and the tongue was broken into splinters, the animals began kicking in the harness and with considerable difficulty the harness was unhooked from the conveyance without having it kicked to pieces. Our friend Curtin looked as if he had been trying to improve his complexion with corn starch, and he will never be paler when dead. —Warned in Time.

In Scotland when an infant is to be baptized the father is bound to show some kind of speaking acquaintance with the shorter catechism. One day a collier went to his minister to bespeak him for the christening of his child. "How many commandments has ye?" asked the minister. "Twenty," rejoined the collier, who was forthwith sent back to pursue his studies in elementary theology. On his way he met a brother miner who was going to the minister on a similar errand. "How many commandments has ye, Joek?" asked the first. "Ten."

"Oh, you needn't trouble him w' ten. I offered him twenty the while, but he wasna satisfied."—Dundee Advertiser.

Butchers in Burma.

All butchers in Burma are Indian born. No Burman will kill a cow or a bullock or sell meat. There is no law against such practice, but no respectable native will kill for food, sport or revenge. Fowl and fish are indeed sacrificed for eating purposes, but every one despises the fisherman. He is a sort of outcast, and the slaying of fowl is done reluctantly.—Westminster Gazette.
