VALLEY RAILROAD

Now a Part of The Great Pennsylvania Railroad System

SOME VAST IMPROVEMENTS

Contemplated in The Near Future -The Road Will be Double-Tracked and The Curves and age. Grades Eliminated.

In an advertisement in another part of this issue will be found the announce ment that on March 10th there will be a special meeting of the stockholders of the Bald Eagle Valley R. R., at the Broad St. Station of the Penna. R. R., Philadelphia, for the formal transfer of the Bald Eagle Valley R. R. to the Penna. R. R. In fact all the preliminaries were settled some time ago and the Penna. R. R. now is in possession of of nearly all the stock of this road. For many years the Bald Eagle Valley R. R. had been leased and operated by the Pennsy on a per cent-basis of receipts. As a result, improvements all along the line have never been of that permanent and substantial character as found along other lines owned by them.

The amount of traffic along the road long ago warranted a double track between Lock Haven and Tyrone. Then there are many heavy grades and bad Lime Works. The scalp was cut and the curves in the road that were the source man rendered unconscious for a short of numerous accidents and great ex- time, but no serious results are anticipense. The road still follows the origi- pated. nal survey when heavy trains like those of today were never dreamed of by engineers. The road bed was located

pass over this link that connects the Northern Central at Lock Haven with the main line at Tyrone, but owing to the rental paid most of it was carried over the branch between Lewistown and Sunbury, which is owned outright by the Penna. R. R. We have been assured that the double tracking of the Bald Eagle, also the elimination of certain grades and curves will be commenced at an early date, which means
