Every quarter section farm should have a flock of sheep numbering from thirty to sixty. If present fences are not adequate the reform should begin here. In any event there should be the sheep. It is well to embark in the business on a modest scale and increase the flock as experience is acquired.

"God helps those who help themselves" is nowhere given a more exact application than in the case of the fellow who thoroughly tests his seed corn. The good Lord can't do much for the fellow who is slipshod and trusts to luck, and this is just as true in the field of agriculture as it is in the realm of morals.

# LAWS AGAINST TOBACCO.

Early Legislation to Restrict the Use of the Weed.

One of the curlosities of early colonial legislation is the laws enacted against the planting and the use of tobacco. Evidently the magistrates and elders of those days regarded that "creature called tobacko" as one of the many emissaries of the devii, against whom it was their duty to wage constant warfare. The planting of it was forbidden except in small quantities to be used "for meere necessitie, for phisick, for perservaceon of the health, and that the same may be

taken privately by ancient men." All keepers of hotels and other pub-

lic places were ordered not to "suffer any tobacco to be taken into their houses." If they disobeyed the order. they were required to pay a fine to the "victualler" and one also to "party that takes it." At little later the law was changed so that it was forbidden to "take tobacco in any wine or common victual house except in a private room there, so as the master of said house nor any guest there shall take offense thereat, which, if they do, the said person shall forbear upon pain of 2 shillings sixpence for every such offense." No one was permitted to use tobacco "publicquely," not even in his own house, in the presence of strangers. It was against the law for two men to smoke together. In Windsor every user caught any one class on the hip more of tobacco was required to procure a physician's certificate before he was permitted to enjoy the obnoxious weed. All smoking was forbidden within two on a capital of less than \$10,000, with a miles of a meeting house on the Sabwhole lot of partial payments made by bath day. Connecticut, as a great incustomers on land negotiated with no dulgence to travelers, allowed a man to smoke once during a journey of ten miles made not by trains, but afoot or by horse locomotion .- New York Press.

### The Truth at Funerals.

# A novel suit for slander was instituted the other day, in Berks county, against a clergyman by a citizen who avers that at his wife's funeral the preacher made a harsh and disparaging and false allusion to him. This is something new in ac-cusation against the clergy. It has long been a common subject of remark that funeral sermons frequently shade off from the straight line of veracity, but usually in the direction of eulogy. It is a poor preacher who cannot discover hitherto unexpected virtues in the THAT the young girls in Bellefonte deceased. The mantle of charity is often stretched when it becomes a shroud.
