It is not known just how long it will take for the preliminary work to be accomplished, but it is certain that with a comparatively short time the plant will be in full blast.
—Four new boilers are being set in place at the Nuttany Iron Works near town. They are taking advantage of the present depression in business to put the plant in first class condition so that when a revival comes they will be in shape to take advantage of the market by producing the full capacity of the furnace. Up to this time the Bellefonte Furnace has been able to keep things moving right along. It is claimed that at this present price, iron cannot be manufactured at a profit.

The Col. insists that he has not forsaken his horses, and that his family are likely to use the new car more than he will.
