TREASURY DEFICIT ABOUT \$60,000,000

Expenditures Greater Than in Any Year Since the Civil War

THE REVENUES HAVE DWINDLED

Only Twice Since Civil War Has Deficit Exceeded That of Fiscal Year Which Will Close With the Present Month.

The forthcoming statement of the U.S. Treasury receipts and expenditures for the fiscal year ending June 30, 1908 will show a marked falling off in the receipts as compared with the year 1907, and a large increase in the expenditures. The excess of expenditure over receipts for the year will approximate \$60,000,000 which has been exceeded only twice since the Civil war. In 1904 there was a deficit of \$69,803,000 and in 1899 there was another of a little over \$89,000,000 and in each of the four intervening years the receipts fell con-siderably below the disbursements.

respectively.

The total receipts this year will be shown to have been about \$599,000,000 or \$64,000,000 less than for the fiscal year 1907. Customs receipts will be shown to have fallen off about \$46,000,-

is due to the panic that came over the country last fall, and depressed all forms of business, closed factories and left hundreds of thousands unemployed. On the other hand the increase of expenditures foots up the alarming sum of \$50,000,000. This is due to extravagant expenditures by the present administration in all the various departments, and especially the millions that are spent on the Philippine Islands, the useless naval demonstration, and such like.

The people have been warned time and time again of the extravagance of the present Republican Administration—and here they have it in cold figures confronting them. They may not like it, nevertheless they foot the bills.

The portable saw mill located east of Old Fort, along the Indian Lane, owned by D. B. Brisbin and company, was totally destroyed by fire the other night, sometime between midnight and three o'clock. The loss is about \$1000. No insurance. The mill had been in operation on the previous day, and strange to say the first intimation the mill hands had of the loss was when on the next morning they went to work, and on arriving at the lumber job, found the elements had reduced the mill to ashes. There were piled about the mill some fifty thousand feet of lumber which was not destroyed. It is also supposed that the boiler of the 25-horse power engine can be remodeled.
