Of Interest To Women.

To such women as are not seriously out of health, but who have exacting duties to perform, either in the way of household cares or in social duties and functions, which seriously tax their strength, as well as to nursing mothers, Dr. Pierce's Favorite Prescription has proved a most valuable supporting tonic and invigorating nerve. By its timely use, much serious sickness and suffering may be avoided. The operating table and the surgeon's knife, would it be believed, seldom have to be employed if this most valuable woman's remedy were resorted to in good time. The Favorite Prescription has proven a great boon to expectant mothers by preparing the system for the coming of baby, thereby rendering childbirth safe, easy, and almost painless. Bear in mind, please that Dr. Pierce's Favorite Prescription is not a secret or patent medicine, against which the most intelligent people are quite naturally averse, because of the uncertainty as to their composition and harmless character, but it is a MEDICINE OF KNOWN COMPOSITION, a full list of all its ingredients being printed, in plain English, on every bottle wrapper. An examination of this list of ingredients will disclose the fact that it is non-alcoholic in its composition, chemically pure, triple-refined glycerine taking the place of the commonly used alcohol, in its make-up. In this connection it may not be out of place to state that the "Favorite Prescription" of Dr. Pierce is the only medicine put up for the cure of women's peculiar weaknesses and ailments, and sold through druggists, all the ingredients of which have the unanimous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended. A little book of these endorsements will be sent, by any address, post-paid, and absolutely free if you request same by postal card, or letter, of Dr. R. V. Pierce, Buffalo, N. Y. Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy, safe and candy.

A Fractured Skull.

Charles Welsh, of Marsh Creek, a fireman on the New York Central railroad, met with a serious accident Thursday night shortly before 12 o'clock. While the freight train on which Mr. Welsh was fireman was passing over the railroad bridge at Millhall, he leaned too far out of the cab, when his head came in contact with one of the bridge supports. He was knocked from the engine and some time later was missed by the engineer, who with other members of the crew instituted a search and found the unfortunate man lying on the bridge in an unconscious condition. He was picked up, placed on the train and taken to the station at Castanea, from where he was taken to the hospital in the ambulance. It was found after an examination, that his skull was

fractured and that he was bruised in a number of places.

Arthur Long Injured

While hurrying along the walk on West Main street Lock Haven between the railroad and the Normans, to catch a trolley car Thursday afternoon, Arthur Long, of Howard, who was attending the commencement exercises, was quite painfully injured. Just as Mr. Long was under one of the large trees which skirt the walk, the strong wind broke off one of the large limbs of the tree which crashed down on Mr. Long's head, inflicting a laceration in the scalp, and rendering him unconscious for a time. He was taken to the hospital as quickly as possible, and there received the necessary attention.

Children Love Sweets

And the sweet they like best—of the sweets which are good for them—is pure Maple Sugar. That's why we boil our wheat, before flaking it, in the pure Vermont Syrup.

That flavor is most enticing.

We are making the best food for children, and we want them to like it. We want them to prefer the food that is best for them. And flavor does more than argument.

Mapl-Flake is the best food for us all.

It is made of wheat—white Washington wheat—the premier food of the world.

It is prepared by a process requiring 96 hours, by which every atom is made digestible. That is the important fact. And it doesn't apply to any other wheat food.

Wheat is largely starch, and starch, to be digestible, must be made soluble.

The particles must be separated, so the digestive juices can get to them.

So we cook the wheat for six hours. Then thoroughly cure it. Then we flake each separate berry so thin that the full heat of our ovens gets to the center.

Then these flakes are toasted, for 30 minutes, in a heat of 400 degrees.

The result is a food that's all food. A food that will all digest. There are other flaked foods—both corn and wheat—made by a process one-fourth as long as ours. They will cost you five cents less per package. But the difference is slight when you add the cream cost to both. And the difference in the process is 76 hours. Seventy-six hours spent to make the food more digestible. Every ounce of Mapl-Flake means an ounce of nourishment.
