Sailor Prince

King Edward's Son and Heir, Who Is Attending the Quebec Tercentenary, and the Cruiser Indomitable, Which Brought Him Over. Je

HE ship which brings the Prince of Wales and his suit to Canadian waters to participate in the tercentenary of the founding of Quebec presents quite a contrast to that in which Samuel de Champlain sailed up the St. Lawrence in the summer of 1608. The French explorer

came across the PRINCE ARTHUR. ocean and went up the broad blue river in a little vessel named the Don de Dieu, with the lofty poop and quaint tackle of the days of Sir Walter Raleigh and the sea beggars. Where a majestic city now stands was then but a group of red men's lodges, the Indian village of Stadacona. Nature had built the high promontory which at this point juts out into the St. Lawrence, but it remained for man to erect a fortification upon it and make it the Gibraltar of America. Following in part the course of Champlain, the Prince of Wales, representing his father, King Edward VII., comes to the American continent in the Indomitable, one of the fleetest and most powerful of the new British warships, and he is greeted on his arrival by a fleet of more than twenty warships, representing five different nations. To make the contrast the more effective those who planned the pageants of the Quebec celebration arranged that a ship in exact reproduction of the Don de Dieu should sail up the river the very next day after the arrival of the Prince of Wales in the Indomitable and that the pageant ship should, in full sight of tens of thousands of people, pass through an avenue of armored vessels representing the might of the naval powers of the world today. Their thundering salutes as the

impersonator of Champlain steps

THE PRINCE OF WALES AND THE INDOM-

may indeed emphasize the difference between 1608 and 1908.

The cruiser Indomitable has been called a "mystery ship" because of the profound secrecy observed concerning her details during construction. She is one of the three sister ships, the two others being the Invincible and Inflexible, which were voted in 1905 and laid down in 1906. They are to all cruisers of the past what the Dreadnought is to all earlier battleships. The Indomitable is 530 feet long and has a displacement of 17,250 tons. She and her sister ships are designed to be the fastest, largest and most heavily armed cruisers yet built. The Indomitable resembles in many respects a fast battleship more than a cruiser. She carries eight huge twelve inch guns, each forty-five feet long and each capable of firing an 850 pound shell twice in the minute.

The Prince of Wales and Prince Arthur of Connaught, representing England's royal family, naturally occasion much enthusiasm among the subjects of King Edward by their visit to Quebec in connection with the tercentenary celebration. The Prince of Wales is the second son of King Edward and Queen Alexandra and on the death of the present monarch will ascend the throne as King George V. He was born on June 3, 1865, and is known as "the sallor prince." He married Princess Victoria Mary of Teck. popularly known as Princess May. granddaughter of Queen Victoria's gers of the Louisiana Purchase expouncle, the first Duke of Cambridge, and she will, on the accession of her husband, be the first English born wife of an English king since the time of James II. In 1901 the Prince and Princess of Wales made one of the youthful experiences have undoubtedly longest journeys ever undertaken by royal personages, a journey covering In a little tin pot of a steam yacht he a distance equal to twice around the and two of his college friends, in orworld. The prince spends most of his der to "see the world." coasted along time at home, however, superintending the shores of the Mediterranean and his estates and looking after the edu- in six months had as many narrow es-

He three years in the West Indies, from is known as "the soldier prince," as he all of which, quite naturally, was acfought in the Boer war, being but a cumulated enough experience for the mere boy at the time.

VERY MUCH IN THE AIR.

Chairman Frank H. Hitchcock and Republican Headquarters In New York.

The Republicans have chosen the taxest office building in the world, the Metropolitan Life building on Madison square, New York, for the location of the theadquarters where Frank H. Hitchcock, as chairman of the Republican national committee, will prosecute the canvass for the election of Judge William H. Taft to the presidency. Chairman Hitchcock and his staff will hold forth on the tenth floor of the building, which is the first floor of the tower. The latter has fortyeight stories on a liberal count and soars to about 700 feet above the street level. The framework of the tower

THE METROPOLITAN LIFE BUILDING AND FRANK H. HITCHCOCK

is now complete, but the stonework which will cover the steel skeleton is not in place yet on the upper part of the structure. However, the lower floors of the new portion of the building have been rented without waiting for the completion of the tower.

AS TO FISH.

Some Rules to Guide the Buyer of Sea Food.

The market price of fish is not always a true indication of its economic value in the family dietary, says an authority. Supply and demand, nearness to its market, season and many other exigencies regulate its price. The amount of waste involved in dressing the fish and the amount of nutrition that it contains measure its value. For example, cod usually costs about half as much as salmon, but it contains little more than a third as much nutrition. Besides, the waste in dressing the salmon is very little, while the waste from the cod is relatively large. The result is that in the end, all things considered, salmon is less expensive than cod. The waste in skin and bone is great in most fishin cod 6 per cent, in haddock 35 per cent. If the same price were paid for a salmon and cod 52 per cent of nutrition would be obtained from the salmon and 19 from the cod.

There is a large percentage of water in the composition of fish-from 50 to 75 per cent on the average. Salt cod contains 67 per cent of water, haddock 46 per cent, oysters 77 per cent. Compared with meat, fish contains much more gelatin and fewer extractives. That is, boiling is the most expensive and the least attractive way of cook ing fish, the loss in nutrition and flavor in boiling being great.

Lean fish, dietitians say, is more easy of digestion than fat fish. Long fibered fish, like cod and lobster, are harder to digest than the short fibered fish. White flesh fish is far easier of digestion than dark flesh, although that with dark flesh has more nutrition. This explains why some persons find bluefish unwholesome.

Fish that has white flesh requires about ten minutes to the pound in boiling and fifteen minutes in baking. The old idea that fish is a brain

food was long since proved to be without foundation. But it has not yet een proved that an overdiet of fish es not lead to skin troubles.

Never buy a fish that has dull eyes. white gills or soft, spongy flesh. When a fish is fresh the eyes are bright, the gills red and the fiesh firm and odorless. Lobsters and crabs, if alive. should be lively, or, if boiled, the lobster's tail should be tight against the body, not hanging limp.

The proper cooking of fish is not a simple matter. If it is underdone it is uneatable, while overdone fish is tough and tasteless. The cooking of a fish depends upon the size, kind, the nature of the water from which it was Until the Equitable Life Assurance taken, its character and the character

with the Boers. The grizzled veteran of many wars wears his honors gracefully in these years of his green old age. He will be seventy-six in September. The decorations he has received make a brave showing, and the list of his titles is a long one. But "Bobs" is the name by which he likes best to be known, and it expresses the affection which is felt for him by the British public. He won his Victoria cross, which he always puts first when adorning himself for full dress occability. The company was a sample of the inhabitants, dwellings, farm, college and other buildings of the Pennsylvania State College. The territory to be supplied being bounded on the South by College Ave., Andrews and Foster farm. East by lands of Walter J. Mitchell and Hartwick, and on the West by lands of Adam Krumrine and John McCormick, containing four hundred acres and for this purpose to have, possess and enjoy all the rights, benefits and privileges of the Act of Assembly and its supplements.

The application is now on file in the office of the Secretary of the Commonwealth' duplicate on file with the Water Supply Commission of Pennsylvania. FORTNEY & FORTNEY Solicitors.
