Mrs. Morse is a lady of rare ability and we hope to hear her again in the near future.

The recent rains, though not so plen-tiful as could be wished, replenished the sluggish streams, clarified the atmosphere, checked the forest fires and germinated the dormant grain, and the glorious weather which succeeded them makes corn husking and potato digging rank among the pleasures of farm life. The rainfall at this point on last Saturday night measured nearly three quarters of an inch.

bought a lot of new machinery-a grain binder, a corn binder, new mower, hay rake, double cultivator, roller, plows, etc.,-that time he woke up two years ago.

He had been doing things the "good old way" before. But Peter's foresight wasn't equal to the task, and he forgot one stem.

His machines are about ready for the scrap heap now. They are worn and rusted. He never even thought of housing any of them-left them right out in the weather all the year round.

Peter passed the farm of a neighbor over in the next valley last spring, and wondered what so many little sheds were round about for. He saw machinery in them that had been used longer than his, and was still about as good as new. when he looked.

Peter will have the cost of several sheds to pay for when he buys a new outfit. We wonder if he will be wiser this time.
