-This is a good time for the street committee to cart off the mud on our streets, which is nothing more than limestone dust, so that next summer they could as usual haul more on. Making streets with limestone dust is about the most expensive thing we know of. yet our street committee persists in the same old practice from year to year, hauling dustion and carting mud away. Crushed limestone, of good size, and plenty of it, with no mud in it, alone will make a good, substantial road, and as we have the proper material so close and low in price, no more money should be wasted in con-structing limestone dust roads that are a continual nuisance, being muddy in winter and spring, and frightfully dusty in summer and fall. Give us solid rock roads that will last, as they are the cheapest in the end. This advice is for the street committee, with no charge attach-ed to it, as we would like to have better roads and less taxes.

Mulfinger, Picasant Gap. x10

FOR SALE:--I have for sale, six good farms with acrease running from 100 to 300-with locations at Hunters Park. State College, Rock View, between Milesburg and Curtins, and near Bellefonte. The prices asked for the majority of these farms are such that I know will inter-est prospective buyers. My system is to sell at the owners figure. There is no speculating in the selling price. To those figuring on buying a farm, here is an opportunity, but don't wait. Make inquity at once. Robert F. Hunter, Criders Exchange, Bellefonte.
