### A Great Success.

The fifth of July celebration at Hecla Park under the auspices of the railroad company and the local Y. M. C. A. proved to be a magnificent success. The attractions drew about 1500 people there from all the walks of life. and it was one of the nicest picnics ever held on the ground. The first thing on the program was a game of base ball which was fought to a finish by Bellefonte and Jersey Shore; with a second victory for Jersey Shore; with a second victory for Bellefonte by a close score of 3 to 2. This was followed by the Marathon race by some members of the Y. M. C. A.; the distance was six miles or eighteen times around the track, of a third of a mile. After going around the track a mile. ### Linotype Starts.

On Thursday, the 8th, the Bellefonte Electric Company began their day service to patrons in Bellefonte. This enables us to operate our new Mergenthaler Linotype machine, and as a result we are able to put up most of the reading matter of this issue by machine. To successfully operate the keyboard is a trade in itself and requires almost a year to become skilled so as to secure the machine's full capacity. For that reason do not expect too much from us at the start; the compositors are taking turns in learning and later we predict they will strike a speed that will make hand composition a snall's pace.

Taking this into consideration, for the present, we must kindly ask the indulgence of the public in one matter: The Mergenthaler Linotype is a wonderful piece of mechanism that has revolutionized the printing business, and naturally is a curiosity. At this time we will have to close our press rooms to visitors, as they annoy the operators, and that interferes with their progress.

Later, when we are in better shape, a general invitation will be extended to our patrons and the public to inspect the new method of setting type.

The building was moreover below the level of the streets, and as the streets are Richard Weston. Jr., Simon Shilling, Harold Hollabaugh, Harris Hartranit, soon to be raised in the making of a state road it would have been more in the mud than ever. To have raised the building and then remodeled it, would have been, to say the least very risky business, because the rear wall was far out of plumb and likely to fall out at any time. Therefore on the suggestion of some of the heaviest taxpayers of the borough which coin-Mrs. Emma Miller, of Clarence, who eided with the best judgment of the board it and it was done The quarters of the schools in the Midsay are more at fault than were those in the stone build-

ing The schools in this building are there only because there was no room in either of the other buildings, and better room, and accommodations could not be obtained anywhere else. The people of the borough are fully aware of the very formidable complaint made to the hoard against continuing school in this building.

The High school has entirely outgrown the provisions made for it in 1887 which were intended, at the time, to be but a temporary location. The students in this school are seated in three different rooms, in which recitations are conducted all the time, and it is absolutely necessary to provide more room for this school. A meeting of the Board of Directors was held on Monday evening at which among other important matters taken up was the completion of the new building.

From all this it is clear that there was but one thing to do, and that was to build anew. And now fellow citizens we are sure you would not have us erect a poor, weak, unsafe building, or one that would soon become so. We are getting one hundred cents for every dollar put into this
