Get a Hustle On.

What Bellefonte needs as much as anything else is a good, live board of trade that will take some interest in the future prosperity of the town. Williamsport would have been dead as a door nail after lumbering had played out, if it had not been for the interest the citizens took in the future welfare of the city. A hustling, active board of trade in Bellefonte would do much to bring small industries here that would make the town as prosperous as when we had the nail works, glass works, scale works, and even the car works, which gave employment to one hundred or more men. Within the past year several industries could have been started here had our citizens been energetic and alert to their fonte academy, was in Bellefonte on best interests.
