A warning to young men: On last Friday night about 8 o'clock, Leonard Watson, one of our young men, employed by Thomas Murray as laborer on the track, became discontented and boarded P. G., a fast freight, to take a ride to Howard, and in some way, was going to get off, and was pulled into the cattle guard, cutting his left leg off below the knee and inflicting a severe wound in his back and several other injuries. The Company took him to the Lock Haven hospital where they amputated his leg and dressed his wounds. This was a shock to his mother, as about six months ago she lost her husband and depended on this young man for her support. The people here desire to extend their sympathy to Mrs. Watson. This should be a warning to the rest of the boys here.

On last Friday night some unknown friends entered the spring house of L. Warner and took unto themselves a couple quarts of milk and a small roll of butter, but were kind enough to leave a four-pound roll in the butter bowl. These intruders had better be on the lookout, as Mr. Warner is prepared for another visit of this kind.

HUDSON-FULTON CELEBRATION NEW YORK CITY

Three hundred years ago, Henry Hudson, an Englishman in command of a Dutch expedition, with eighteen men, explored the Hudson River from Sandy Hook to Troy in his small craft, the "Half Moon."

One hundred and ninety-eight years later, Robert Fulton established, with his steamboat, the "Clermont," a regular water service between New York and the towns along the Hudson river to the North.

This year, New York City, with sister cities and towns along the Hudson, will celebrate these two achievements by a series of imposing observances, religious, historical, military, naval, musical and literary, extending from September 25 to October 9.

Replicas of the "Half Moon" and the "Clermont" have been built and will play a large part in the celebration. They will be the centre of attraction in the great naval pageant on Saturday, September 25. The United States Government will have fifty-two war ships anchored in the Hudson, and Great Britain, France, the Netherlands, Italy, Germany, Argentina, Guatemala, Mexico, and Cuba will be represented by war vessels.

Two great parades of water craft will escort the "Half Moon" and the "Clermont" in triumphal procession past the war leviathans, first in the morning and again in the evening, when all the vessels will be illuminated.

On September 25 there will be a grand historical pageant, and on September 30 a big military parade in New York City.

On October 1, the "Half Moon" and "Clermont" will proceed up the Hudson to Troy escorted by hundreds of river craft, including torpedo boats.

A magnificent carnival parade will be held in New York on Saturday evening, October 2, which promises to eclipse all previous attempts.

The Pennsylvania Railroad, the direct line to New York, with its unsurpassed service of fast express trains, will sell excursion tickets to New York for this period at reduced rates of fare.

Full details concerning specific fares, dates of sale, return limits, and train service may be obtained of Ticket Agents.

The Most Enticing Breakfasts Are Now Shot from Guns

Puffed Wheat and Puffed Rice were served last month for seventeen million meals.

But millions of others lacked them. There are millions yet who don't know them.

If you are among them, we invite you to try them. Serve one of these foods tomorrow.

The world, as you know, doesn't jump to a food which all are not finding delightful.

Puffed Wheat—10c

The foods of the day are the foods that are best. That is always so.

The foods of this day are these crisp, gigantic grains—puffed to eight times their natural size.

These whole, unbroken, nut-like grains, made four times as porous as bread.

You'll like what others like. We do you a kindness when we ask you to try these foods.

Puffed Rice—15c

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.

One package will tell you why people delight in them. Order it now.
