### Mr. and Mrs. Eby's Good Work.

On Sunday the residents of Bellefonte had what might be called a guests of General and Mrs. James A. Beaver, Mr. Eby is superintendent of religious work employed by the State Committee of the Y. M. C. A., his work being mostly in large citles. He is a religious giant and hundreds of men in Pennsylvania owe their suc-cess in life to him.

On Friday evening a banquet was given in the Y. M. C. A. gymnasium in his honor which was attended by sixty-five gentlemen, among whom were some of Bellefonte's most pro-gressive business men. Prof. James R. Hughes was toastmaster and the principal address was made by Mr. Eby upon the marvelous work being by the Young Men's Christian Association. One statement he made was that the night schools conducted this organization contained more students than all the colleges and schools in the state, leaving out the

### A USEFUL RELIC.

Since the county commissioners have concluded to equip the court house with a new electric clock, that will have an illuminated dial to en-able fellows of the 'wee sma' hour brigade to read the time of their goin' brigade to read the time of their goin' home, it will throw out of commission the faithful yet servicable clock that has struck the hours from the court house dome for half a century. How dispose if it? Which of Centre coun-ty's pretty villages wants a town clock? There's Unionville that has Domino, it might be proud to have the outfit. Then there's Howard, Mill-heim, Centrehall, and the rest, who know a good and needful thing when they see it. She's good on a strike see it. She's good on a strike they

# Has Some Friend Told You of Foods Shot from Guns?

Folks who eat Puffed Wheat and Puffed Rice are sorry for those who don't.

So they tell of these foods to others, and the others tell others. That's how the use is spread.

Please ask some housewife to tell

Or try them yourself. One package of Puffed Wheat, at a cost of ten cents, will reveal a new delight.

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

[3]

You will know, for the first time, how good cereals can be made.

You will see grains that are crisp and nut-like, puffed to eight times their natural size.

You will see grains made four times as porous as bread-ready to melt in the mouth.

You will see grains made digestible -with every starch granule exploded.

And you will see foods that children like better than any foods you know.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.

One package will tell you why people delight in them. Order it now.

Made only by The Quaker Oats Company

Puffed Wheat-10c Puffed Rice-15c

you how her folks enjoy these foods.
