REBERSBURG.

Celebrated 66th Birthday:—Last Thursday, Feb. 4th, R. D. Bierly, of Rebersburg, a life-long and highly respected citizen of Miles township, passed the 66th mile stone of his life and his children, grand children, near relatives and immediate neighbors assembled at his house and gave him an overwhelming surprise. This date also marks the 17th birthday of his son Ray.

Early in the evening Prof. C. L. Gramley impressed upon Mr. Bierly's mind the importance of attending choir rehearsal to be held at the former's house, and helped pave the way which later landed Mr. Bierly before a household of "uninvited" friends and relatives. The expression on his face at that particular time can be more easily imagined than described.

After spending several hours in merrymaking, refreshments were served. Following this, addresses were made by Thos. E. Royer, Prof. T. A. Auman and Mr. Bierly himself. Mr. Royer recited history bearing on the early career of both the subject and himself and kept the guests in an uproar.

Mr. Bierly has for the past forty years held his own as eastern Centre County's leading builder and contractor, having learned and mastered his life work in early manhood. Centre Hall, Millheim, Coburn, Anaroburg and his home town of Rebersburg, form a network dotted with buildings designed and erected by him, and such edifices as the Millheim public school building, the Millheim Lutheran church, the homes owned by William Kreamer and E. O. Hosterman, and the same place, the public school building at Rebersburg, and many others, will stand as monuments to his memory, and will be something for his lineal descendants to point at with the finger of pride long after the builder's form reposes under the turf.

Before departing all present wished him many happy returns of the day.

HUBLERSBURG.

A Birthday Surprise:—At the annual meeting of the West Susquehanna Classis of the Reformed church last May, the Zion congregation of the Bellefonte charge, and the Hublersburg congregation of the Nittany Valley charge were united to form a new charge.

Last Wednesday, Feb. 2, being the birthday anniversary of their pastor Rev. H. L. Crow, about one hundred and fifty of his members and friends of the new charge assembled at his home in the evening, taking with them an abundance of essential household commodities. The contributions included generous quantities of candies, and grains, as well as a handsome Morris chair and a liberal purse of money. For refreshments, the ladies served ice cream and cake. The evening was spent in social conversation, music, and a brief but pleasing address by the pastor.

These material signs of appreciation but show the esteem in which Rev. Crow is held, not only by members of his church, but by the community in general. His pastorate in the Nittany Valley charge which covered a period of over nine years was the most successful in the history of the charge, and the least we can do is to wish him even greater success in his new field.

Afflictions some times follow each other in rapid succession; such was the case with our friend C. F. Hoy. His older son fell sick with scarlet fever, in December and the two younger children were taken to their grandparents. Hoy's house was quarantined. In due time the quarantine was lifted, the house fumigated, and the two children brought home. A few days later and they took the same disease and the house was again quarantined. Last week, Dr. Kurtz, the health officer for this district, removed the quarantine and fumigated the house the second time very much to the relief of the family, and their neighbors. Then Mrs. Hoy suddenly very sick, the family Dr. was called. Her sickness, however, is not scarlet fever and she will be alright in a few days.

M. A. Williams, a hunter and trapper, had the good fortune to trap four native rats, a species that is very scarce in this country, for when the first white settlers came to America they brought with them the little black rats which destroyed the most of the native rats, as the latter were easily subdued, not being fighters. He sent two of the ones trapped to State College and they are being mounted. They were the first that they could get from any source, as these rats reside in the forest regions and live on roots and herbs.
