ZION. A banquet for little ones—Mr. and Mrs. John Eby, of Zion, gave a very delightful party in honor of the little ones of the church, last Saturday from one o'clock until five, in the afternoon.

At one o'clock the house was filled with jolly little people. Mrs. Eby had everything in readiness with all sorts of amusements for the children.

Mr. Eby was the promoter of the affair. The children were entertained by Anna Rockey, who is acquainted with many appropriate games, and among those present were many of her pupils.

At four o'clock all were summoned to the dining room where plates were laid for all assembled; and by Mrs. Eby's thoughtfulness no one had to wait for a second chance.

L. P. Shaver had quite a thrilling experience last Saturday; he had two horses hitched to a carriage which contained several relatives of the late J. K. Moyer, and who, after attending the funeral, were on their way to the depot at Coburn. Between Centre Mills and Millheim the team became unmanageable and two of the occupants jumped out and the remaining two hung with full force to the lines; near the toll-gate they got stuck and stopped but they did not have any more desire to ride behind the prancing steeds, so they telephoned for an automobile which soon made its appearance and conveyed the party to the station just in time to catch the train.

HANDY MEDICINE CASE.

How to Make One at Home Out of Linen or Canvas. For the friend who cannot travel without her pet remedies a homemade medicine case would make an acceptable gift. It is easily made to hold one's special bottles and has the advantage of adding little weight to the satchel or suit case.

Cut an oblong piece of heavy cardboard and stitch it between two pieces of heavy tan colored or dark red linen or canvas. The covering is cut longer than the cardboard on the ends to allow for seams and stitching.

The sides of the linen are enough longer than the board on both sides to permit it to be folded over in envelope fashion when the case is closed.

When the cardboard is in place the cover is stitched close to its edge all around. These edges may have four or five rows of stitching or can be bound with white linen braid or a braid of a contrasting color. The same braid is sewed to each end of the case to strap the flaps into place when folded over.

The inside of the case is finished with two bands of the material, one above the other, and divided into pockets to hold the various bottles of medicine. The compartments are divided by machine stitching or close brier stitching. They should be deep enough to hold a bottle up to its shoulder.

Two oblong envelopes and a long, narrow one of the linen are added to hold absorbent cotton, gauze bandages, court plaster and a few simple utensils, such as a medicine dropper, hypodermic syringe case and a clinical thermometer. Between the case two linen straps are arranged to hold a pair of scissors.

On the outer flap of the case should be embroidered initials or monogram in tones to match the braid. Several thicknesses of cotton batting should be cut to just fit inside the case over the bottle. They can be buttonholed loosely in colored cotton to hold together. This covering or one of elder-down is slipped over the bottles when traveling to keep them from spilling.

While it is not necessary to fill this case, it is as well to put in bottles, at least. Buy them first, so the compartments can be made to fit. Those without patent stoppers are best.

REMOVAL OF STAINS. How Thirteen Kinds Can Be Easily Taken Out.

Fruit.—Pour boiling water through or use alcohol.

Chocolate or Cocoa.—Wash in cold water, then pour boiling water through.

Tea.—Wash in cold water, then in boiling water.

Coffee.—Pour boiling water through. Iron Rust.—Cover with lemon juice and salt, then put in the sun, or make a paste of cream of tartar and water and cover the spot, putting in the sun, or wet the spot with lemon juice and hold over a hot iron (good for white wash goods).

Grass Stains.—Wet in cold water, cover with cream of tartar and put in the sun, or use alcohol if goods cannot be washed.

Mildew.—If fresh wet in strong suds, cover with paste of salt and soap and put in the sun.

Blood.—Soak in cold water or water and salt. When nearly gone use soap and water or use starch paste.

Wine (red).—Cover with wet salt and wash in hot water.

Machine Oil or Axle Grease.—Cover with lard and wash with soap and cold water. Finish with hot water and soap.

Red Ink.—Ammonia and water, milk or cream or cold water and soap.

How to Make "Bread Boxes." "Bread boxes" are an artistic, cheap and delicious way to serve many entrees as eggs, chestnuts or greens. They are easy to make, but comparatively few women understand it. Cut stale bread at least two days old in four inch cubes, having first removed the crusts. Dip each cube into slightly beaten egg and fry in boiling lard in a frying basket. Remove when golden brown and drain on brown paper. Cut out a square from one side of the cube a quarter of an inch smaller than the box and dig out the crumb, leaving the sides and bottom about a half inch thick. Before using set the "bread boxes" in a hot oven to heat through, fill with whatever mixture is desired and add the lid or not, as preferred.

How to Freshen Velvet. To clean a velvet suit sponge the spots with pure alcohol; then suspend the suit on a hanger in the bathroom in such a way that the air can reach all sides of the garment. Turn on the hot water in the tub until the steam fills the room. Shut the door and windows. Shut off the water and let the steam do its work for an hour, but do not touch the garment until it is perfectly dry. You will be surprised at the newness of your suit.

How to Clean Ermine. First beat and brush out all the dust to clean ermine. Lay the furs upon a clean cloth and with a new, perfectly clean sponge wet the ermine down to the skin with grain alcohol. While it is wet sift into it all the borax talcum the fur will hold. Do it quickly, lest the alcohol should evaporate. Shut up in a box for a week, then brush, shake and "dress."

How to Wash Comfortables. Wet the comfortable, then rub well with naphtha soap, hang on a line and turn the hose on them until the water runs clear. Let them hang until dry, then shake them out, and your comfortable will be light and fluffy, like new ones.
