The walk should "lead from some where to something." It should have a purpose, which is primarily to give access to the garden, but if there are any fandscape features in the garden. as there should be, it should become a portion of their motif. If there is a pergola, arch, arbor, garden house or garden seat the access thereto should be by the main walk and not by a lateral path. This presupposes a garden of considerable-extent, as these features would have no place in a tiny one; but, lacking these, there must still be something to which the walk leads. It should not end against a wall, fence or the side of a building. but if it approach them should be continued along them to end definitely somewhere, as a door to a building or a gate in a wall, fence or hedge. This marks the real difference between the walk and the path. The latter may lead anywhere and end nowhere. It may lead into and stop at a clump of bushes and may wind and turn at convenience.

Wedding Invitations.

They need not be answered anless the recipient is an intimate friend. Then a congratulatory note may be sent.

An announcement demands no reply. The matter of wedding gifts is, of course, an unsettled question.

There are a number of well bred persons who do not respond to an invitation with a gift, believing that it is poor taste to send gifts to them whom they scarcely know, but to whose wedding they may have been invited for some reason of courtesy. . Of course the fact that one knows the groom rather than the bride makes no difference one way or the other. It is to the bride that the gift is sent.

An "at home" card inclosed in the invitation necessitates a call within the time named or, if one lives in a distant city, a card sent by post.
