INTERESTING SERMONS.

For six weeks past Rev. J. Allison Platts, pastor of the Bellefonte Presbyterian church, has been preaching alternate sermons to young ladies and gentlemen on Sabbath evenings. These sermons were based on letters which he received from the very best and most influential men and women of this community. Many of them showed deep thought and careful preparation and, in themselves, were masterly sermons, just the kind that should be heralded from the christian pulpits everywhere.

The contained truths that should be burned, as it were, into the hearts and conscience of every young lady and gentleman in Bellefonte. On Sunday evening, May 1st, Dr. Platts preached an other of his excellent sermons to young men. Those who are capable of judging certainly could not have come to any other conclusion but that the discourse was in accordance with conditions as they exist. For this reason, Dr. Platts, announcing his text, Dr. Platts stated that he had made inquiry about how the congregations liked these sermons and he found that some objected to them upon the ground that they did not contain enough of christianity. So, for the present, he would discontinue the series. The christian fanatic, be it a man or a woman, who places a stumbling block like this in the path of the minister's duty is taking upon himself more authority to judge than the Almighty intended they should, and if stripped from their self-righteousness they probably would be found sadly lacking of what constitutes a true christian. To-day parental instruction in the home is almost a thing of the past. Its how can I give my child social position, even if he or she must get it through the card table, the dance or intoxication. For this reason, to be fair it is right that every minister of the gospel in Bellefonte should take into the future honesty and integrity of our young ladies and gentlemen in a methodical way, such as Dr. Platts has been doing. There is more genuine christianity in a sermon of this character than in one that only tickles the fancy and goes no further than self. No, what the kirkers to sermons like these should have done would have been to thoroughly search themselves and gone out in the by-ways and hedges with young ladies and gentlemen who should hear the truth abashed lines that would better prepare them to meet the duties and responsibilities of a life of misery and regretfulness in the hereafter. This is true christianity, and there are some other things to be fair to Dr. Platts we would just add that he knew nothing about this article and therefore is not responsible for anything it contains.

Made Corset Out of Cans. Mary Taylor, nine years old, daughter of John P. Taylor, a farmer near Petersburg Ind., is as vain of her "figure" as any miss of eighteen. Besides vanity she has ingenuity. So some weeks ago she took some tin cans, melted them so they would run, and then cut nine strips of tin, which she hammered into the shape she desired, covered them with heavy muslin and, lo, she had a pair of corsets.

Mary has another characteristic of many of the grown-up members of her sex—a fear of lightning. One morning recently during a severe electrical storm she crawled under the rear porch of her home. She was surprised to find her mother, who she had turned corsetier. Lightning struck the house, partially wrecking it, but no one was injured save Mary.

The little woman was taken from her hiding place unconscious from serious burns. Her mother undressed her and was surprised to find the rudely constructed corsets, for Mary had kept secret her corset in the apparatus of beauty. One of the stays contained a small hole, the tin having been melted by the lightning. Mary may recover.

After Fake Extract Dealers. Dairy and Food Commissioner Fouset of Altoona, on Friday ordered a crusade against the fake extract dealers being sold in the State, the first suits being ordered brought in Beaver county where so-called lemon, banana, strawberry and peach extracts were found not to contain any fruit juice, but a diary in the archives of the cathedral at Viterbo containing an entry dated April 5, 1906, recording the appearance of a comet. The discovery is very important, since it constitutes proof that Halley's comet was seen in 1066.

Comet Balks Elopement. The interest of Samuel Winterburn, of Charlestown, Mercer county, in Halley's comet, prevented the elopement Friday morning of his pretty daughter, Margaret, aged 17. Winterburn had objected to the marriage of his daughter to R. F. Johnson, of Hadley, Pa., because of his daughter's youth. But the young people decided to marry and 3 o'clock Friday morning was the time set for the flight.

Just before the hour Winterburn, anxiously to see the comet, arose. He found his daughter dressed, her suit case packed and the girl awaiting the summons to leave her home. She demurred when he demanded the truth, but a faint call from the roadway outside the house discovered Johnson, waiting beside his buggy. Seeing Winterburn, instead of the latter's daughter, advancing from the house, Johnson drove away in a hurry.

COMET WON'T HURT US.

How keen the interest in New York is in the visit of Halley's comet was shown recently at Columbia University. At a lecture on the big visitor by Dr. Harold Jacoby Rutherford, professor of astronomy, the theatre of Schermerhorn Hall was thronged. Dr. Jacoby said that though the earth will be enshrouded in the gaseous tail of the comet we shall not be in danger. He estimated that so thin and attenuated is that part of the tail we will be in it, will not amount to more than one molecule of comet tail gas to a cubic mile of our atmosphere. That quantity is not enough to alter the taste, smell or appearance of our air, he said, and the man who tried to catch that little molecule-dodging about in the space of a cubic mile would have to get up early in the morning.

The audience was delighted with experiments which illustrated some of the funny ways of comets. These experiments showed that when a comet is born it wants to go straight, but circumstances are too strong for it. It keeps on trying to cling to the good and narrow path, but breaks all its resolutions, and can't help it. For like men, some wickedness inside makes it fall into the temptations of the various attractions it finds in its way. But it never gives up. That is where it differs from man and woman, said Dr. Jacoby.

Dr. Jacoby has built great hopes on the comet's visit. The other times it has visited it has given rise to quite a number of catastrophes. He is trusting that on this occasion, too, great minds will be one of the results. But he has pessimistic moments.

Bride Earns \$600 by Dancing. Miss Joseph Barry, a bride, made \$600 by dancing night at the 27th at Madison, Ill. Mrs. Antonia Ropesak, twenty-three years old, was married to Joseph Barry, age 26, in Venice, Ill. They returned to East Madison, and at night the festivities began. According to a Polish custom, every man present is expected to dance around the room with the bride and to hurl a silver dollar at a china plate. If he breaks the plate he may dance again. In any event, the bride keeps the dollar. When the proceeds were counted at daylight the bride had six hundred silver dollars. As some plates were broken, she must have danced many times.

If a smile hurts you for goodness sake just grin and bear it. The Potato Slump. The great drop in the price of potatoes may have the effect of a similar experience some years ago. The tundra in the fall and winter brought high prices and many held the crop over with the expectation of a still higher price in the spring. But when spring came there was such an abundant crop on hand that there was no demand whatever, and many potatoes were hauled out to rot. We remember farmer John Hamilton, of State College, telling us that he had hauled out five hundred bushels of potatoes for which there was no market—others were caught in the same slump. On an average potatoes sold in the fall when raised bring a paying price, better than wheat from the acre, besides avoiding the unpleasant second handling from the bins later on.

Oil Dealers Immune. "Selling oleomargarine for butter is not an offense," declared Commissioner of Internal Revenue Cabell before the appropriations committee of the House at Washington, D. C., in discussing the sundry civil appropriation bill. Commissioner Cabell told the committee that there has been a steady increase in oleomargarine frauds and that the decisions of the courts, particularly in New Jersey, Kentucky, Missouri and Colorado, have deprived the government of the right to assess penalties and to enter and search premises without warrants.
