The supervisor had Earnest Stover with his engine and stone crusher, of Aaronburg, crush stone for our township at \$8 per day. Which is the cheaper, to hire a stone crusher and engine or buy one for Gregg township? I say to hire one is the cheapest.

A few years ago this township spent \$800 and they claim it is worn out already. Well, what can you expect if you have a different set of men every year to run machinery, who don't know how to care for it; can't last long. Let the good work go on and improve our roads.

We hear that Dick Newman, of Hannah, a former track foreman for the P. R.R., with a crew of 13 men, has commenced to learn to drive ducks. Do you know them by their quacks yet. Dick! If not, how do you and "Wearly Willie" tell your flocks apart? for they all look alike to us.

Brothers of the P. O. S. of A. don't forget the sermon on Sunday the 29th, at 10:30, as some, if not all, of you heard Rev. McKelvey talk at the flag raising; you are aware he knows how to speak on patriotism; we hear the subject of which he will speak from is "Liberty."

TO REPLACE RUBBER.

Westinghouse's Invention for Automobile Tires.

A new invention which may rival in importance his air brake has just been completed by George Westinghouse, of Pittsburgh; the famous inventor. It is known as the air spring, and by it, Mr. Westinghouse claims, the expense of running all rubber-tired vehicles will be decreased at least 60 per cent., since the rubber tire may now be dispensed with. It is claimed for the new invention that it will ultimately reduce the price of automobiles one-half. The patent rights to the air-spring invention have been sold to the Westinghouse Machine company, recently incorporated, in which Mr. Westinghouse is the majority stockholder.

The new air spring is a series of plungers working on air cushions on the same principle as an elevator plunger. One is placed under each corner of the frame of an auto. Each spring is a cylinder about three inches in diameter, and perhaps ten inches long, the plunger connecting with the auto frame. It is claimed by Mr. Westinghouse that an auto fitted with solid steel tires and with air spring rides more easily than does the rubber tired auto.

HAPPY ON 107TH BIRTHDAY.

With mind still keen and with an unabated interest in life, Elizabeth Wonderly greeted her one hundredth and seventh birthday the other day at the Methodist Episcopal Home for the Aged in Philadelphia. Mrs. Wonderly was born in Smyrna, Del. Her father, who was a soldier in the Revolution, lived to be

ninety-nine, and her grandfather was one hundred and five when he died. Mrs. Wonderly held a reception in the chapel of the home, with prayer and songs and recitations on the program.

Don't Cut It! —the ATLAS E-Z Seal Jar Will Hold it Whole

That's one strong feature in favor of the "ATLAS E-Z SEAL"—it has a wide mouth for large fruits. Another is its uniform thickness—no thin spots or weak places in an ATLAS E-Z SEAL Jar. Still a third good point is its smooth top, which can't cut the hand when sealing. Be sure to ask your dealer for the ATLAS E-Z SEAL Jar and take no other.
