WASHINGTON ITEMS.

What Causes the Increased Cost of Living?

The American people will recall that Senator Henry Cabot Lodge's price-investigating committee found that no part of the 58 per cent increase in the cost of living in this country in the last 10 years was due to the tariff.

Political economists all over the land were sorely puzzled at the report. The phenomena can now be explained. The report of the minority of the committee, just being published, shows that the Republicans made no serious attempt to ascertain whether the tariff was responsible or not.
