That a woman in Bellefonte may not avoid muddy crossings; it all depends on her understanding.

That there are some smooth people in Bellefonte who, if given a chance, will make it tough for their friends.

That Dr. Coon, of Scotia, probably will tell you that the rural doctor can. not tell how his garden is progress-ing, by counting his beets.

That there is a class of people in Bellefonte who claim they don't worbut take things as they come. "Billy" Hurley, the sheriff, is getting rich off a portion of this class of people.

That a certain married man, residthe West ward of Bellefonte, had better stop flirting with a young lady who is a perfect stranger. It not looks ridiculous but he may get thrashed one of these days.

That Frank Kern, of the Bellefonte City Laundry, would like to know how to mark table linen so it will show, let him furnish that little son of his with a piece of huckleberry pie, on a clean table cloth, and he will show him.

That most girls in Bellefonte are thoroughly stuck on themselves and while dressing they will stand in front of the mirror for an hour admiring their form, and wish that some young man could gaze on it, if only for a minute.

That a certain young man in Belle-fonte who is dead in love, should not haunt the lady of his choice at a ball, picnic or party. She has certain civilities to pay elsewhere, and if he follows her like a penny-dog the first thing he knows she will sour on him.

That "Jake" Marks, of Bellefonte, says a man never realizes the superiority of woman so much as when he is sewing on a button without a thimble, pushing the needle against the wall get it half way through and pulling it through, the other half, by hang-ing on to it with his teeth.

That Johnny Rowe, while playing ball the other day with the "Fats," and the Leans," had so many errors that the fellow keeping score couldn't find enough of space on the scorebook, so he began stroking on the bench on which he was sitting. They call that "The Comedy of Errors."

That they say the "Fats" had a dead cinch on the "Leans" the other afternoon with "Pet" Meek on second. When the ball came toward him he would always dodge it, being afraid that it might accidentally fall into his An apron would be more serhands viceable than kid gloves, anyway.

That Frank P. Blair, of Bellefonte, umpired a game of ball between the "Fats" and the "Leans" the other afternoon and it is a wonder that he came back with even one hair on his head. They say that some of those decisions were so rank that there was a peculiar odor way up at Haupt's farm, on the mountain.

The place had been abandoned for to the advantage of providing facilities for the receipt of their mail by erec-ting convenient accessible, boxes or territory in less time if not compelled to wait for an answer to their ring. Private receptacles for mail are also a great convenience to the householder obviating the necessity of responding to the carrier's call at inconvenient moments and permitting the safe delivery of mail to the householder. They also prevent the occasional necessity of carriers proceeding on his route without delivering mail because of failure to answer 'his ring within a reasonable time and en-able him to make deliveries to patrons living on or near the route at an earlier It has been shown by actual experience that the benefits derived from patrons of city delivery from the use of such receptacles far outweigh the small expense involved. As this office is interested in furnishing the best possible service at least expense, your compli ance with suggestions will be much appreciated. It is estimated that the saving of half a minute at each house in any town would mean the extension of the delivery system and more frequent service.

Peach Trees Planted in Idle Moment Prove Bonanza. An idle moment and 20 cents have just brought \$100 to the pockets of Oscar Wotring, sperintendent of the Lehigh Portland Cement farms, at Sieglersville, Pa. Several years ago he planted 20 peach trees in his front yard, at a cost of a cent each. He wanted to see whether, if they were sprayed, they would die as all the peach orchardsof the neighborhood then were under the ravages of San Jose scale. The trees this year bore

their second big crop. Last week an enterprising young milkman offered Wotring \$100 for his crop the offer being accepted cash down in advance. Since then the milkman has picked 284 baskets of choice fruit, which he has sold at an aver-age of \$1.06 a basket, or a total of \$293.16. Last year, when the peaches were scarce, and netted more than double this year's prices, Wotring From a peach tree which the late Clinton H. Such codfish aristocracy makes you tired; it gives you a pain. Such people would have no prestige if it wasn't for their money Its the old story-"money makes the mare go."

That the Young Ladies Admiration Society of Bellefonte held a meeting on Thursday evening and counted oses as to which one had the best marriageable proposition since they last met. A resolution was passed that the lips of no young man should press theirs who smoked cigaretts, chewed tobacco, drank beer or whisky, unless he had some "dough." Some of them are getting to that point where they will begin praying for something, just so that it wears pantaloons.

That often the Ladies' Aid Society or sewing club in any church is de-trimental to the cause of christianity rather than a power for good. Their meetings can be likened unto gossip shops, where a molehill becomes a towering mountain; and if they ran short of material to talk about they place the minister on the dissecting table, and after they are through tearing him to pieces, they commence on the poor sexton and think his salary ought to be reduced. In these societies is where most of the church has the job. The old stone mansion troubles originate.
