PORT MATILDA.

Butcher time is here again. Some have pretty nice porkers, some not so nice, others small, and some none at all. Curtin Spotts has made the best record yet. Killed three pigs and had 215 lbs. of meat, besides sausage and lard.

Our deer hunters returned without any venison. The writer was with them. We saw some deer, and I had a good open shot at one, but it had horns, hence I did not fire. We were camped near the camping ground mentioned by A. Williams in his diary which was printed in this paper. He would not know his region were he there now, as all the timber has been cut, and red brush taken its place. We followed several large tracks until we found out that they were deer when we quit. It makes you feel good after following a deer one half a day to find out it has no horns. Also when you feel sure you will rout a big buck in the next bunch, and just there some one else has cut in ahead of you on the track. The deer on this locality seemed to be wild, and did a great amount of traveling around before they would lie down. We followed two from 7 a. m. till 5:15 p. m., before we ever caught up with, and routed them. Three camps were made in this district, and neither camp has gotten anything but rabbits and pheasant. We routed a small bear one day and chased it right into the hands of three men who are trapping near Beaver. These men's eyes must have been big when they saw poor Bruin for they were not over 25 yards away from him when they fired their first volley, and some of their bullets went about 8 or 10 feet wild of the mark. One just cut a bunch of hair off but brought no blood. Their nerves got steadied up though and before he got a rod away they knocked him over. He managed to get some distance in the brush when he finally gave up the ghost. We were close enough to hear the shot plainly, but far enough away to not get the bear. Good luck to those who got it, and hope you may do as good a favor sometime in the future.

Commissioner Jacob Woodring is building a new barn to his house, on his farm near town. The building is being done by D. G. A. Harshberger, of our town.

We were told that two men attempted to break into Curtin Spotts' meat house the other night. We suppose to steal his meat. Mr. Spotts saw the men and believes he can name them. He succeeded in frightening them away before they got anything, but he states that if he had heard them when he did that they would have been successful. Mr. Spotts is a cripple and has a hard way to make his living, and any lazy, good-for-nothing villain that will steal meat from him is little enough to do anything. The country is well rid of those kind of people.

Our teachers say they have so many visits from directors and parents that they can record them all in ciphers. Why? Do you people know whether there is actually a school in session at all? If you had a horse or cow in pasture somewhere you would go and take it a little salt now and then. You don't know what kind of pasture your child is feeding on. It is about time you go and see. Please try to (not more than ten or fifteen of you) visit school on the same day or you might cause the teacher to have nervous prostration. Take it a little more moderate. A few teachers and a few tomorrow, until the teachers get used to the new order of things. Are you doing your duty? Think over it, and let the echo answer.

Thanksgiving day in Reese Cove was an event well filled with the enjoyments of a wedding at the home of Mr. and Mrs. C. Reese. The parties most deeply interested were Mr. C. Roland Lord, of Woodland, a trusted telegraph operator for the P. R. R. Co., and Miss Edith W. Reese, the latter's interesting daughter of Mr. and Mrs. C. Reese. The report of the gun, very often followed by the squeal of the pig, can be heard in all directions, and the tales that are told in the country are so forceful and address speaker to listen to. Oh, such hog!

Our friend John Kaufman, who doesn't do things by halves or take long chances on a guess, put his three hogs over the scales and their total weight was 1185. John is a good fellow but misses the mark sometimes. He was sure Berry would be elected—but he wasn't—so he lost. He was sure of 1000 of pork—he got more, so he won. He thinks now that he is about even.

Water is getting scarce with us; wells are getting low and cisterns empty; some farmers are hauling for stock and butchering purposes.

The Lutheran congregation and some of the members of other denominations of this place, were treated to a fine lecture on Sunday afternoon in the Lutheran church by Rev. Santell, who is working in behalf of the anti-saloon league. He chose as his subject the "Conservation of our Natural Resources," and handled the subject without gloves, striking right out from the shoulder, letting the chips drop where they may. During his sermon he pointed out the difference between the natural resources as advocated by statesmen and politicians and that advocated by the anti-saloon league. The former put great stress on the conserving of minerals, lumber, water, etc., while the latter is putting forth its strongest efforts to conserve the boy and girl from the demon alcohol. In the future, the boys and the girls are this country's most valued resources. The league, in conjunction with other temperance organizations, have a large field for labor, and there is much work yet to be done before the demon is conquered.

Our hunting party came home on Saturday afternoon at a few days but no bucks. The former were dear at \$100 a piece, so they concluded to let them run for breeding purpose, and came home without any. Hard luck, boys.

Many Does Killed.

Violation of the game laws which protect deer seem to be more frequent than usual this season and something like 16 arrests for killing does have been made in various parts of the State, according to an estimate of the State Game Commission. No accurate table has been compiled, however, and until all the wardens are heard from no details will be given out.

A Joke on "Snyder."

Union township, Snyder Co., does not want telephones. When linemen of the Middlecreek company subsidiary to the Bell corporation, arrived there they could not find places to locate. When they put up a pole it was cut down. They have appealed to the court for help.

Temporary Heat Quickly

Did you ever stop to think of the many ways in which a perfect oil heater is of value? If you want to sleep with your window open in winter, you can get sufficient heat from an oil heater while you undress at night, and then turn it off. Apply a match in the morning, when you get out of bed, and you have heat while you dress.

Those who have to eat an early breakfast before the stove is radiating heat can get immediate warmth from an oil heater, and then turn it off.

The girl who practices on the piano in a cold room in the morning can have warmth from an oil heater while she plays, and then turn it off.

The member of the family who has to walk the floor on a cold winter's night with a restless baby can get temporary heat with an oil heater, and then turn it off. The
