Are Children Worth Bringing Up?

Can It Be Done Without Rubbers?

This is what appeared in a recent number of the AMERICAN JOURNAL OF HEALTH.

The family doctor should din it into the mothers head all the time, that the health of their children's lies in their feet.

Keep the feet dry. Never let them get wet. No child should be allowed to go out in the snow or rain, or when walking is wet, without rubbers.

REMEMBER—YEAGER'S RUBBERS are best and the prices just a little CHEAPER than the other fellows.

REO THIRTY

In 10 Different Styles—From \$500 Up

Absolute proof of the qualities you want in a motor car—the 10, 1.2 day and night record of the Reo from New York to San Francisco

Reliability—the first and most important. Half of the 4000 miles between New York and San Francisco is desert and mountain trails—the worst roads in the country; deep wash-outs, rocks in the road, often no road at all. A car that can keep on going at such a rate over those roads will do anything you can ask of it.

Power. The Rocky and Sierra Mountains, and the desert in between gave the Reo lots of stiff and rough climbs. You'll never find a harder or stiffer climb in all your motoring.

Speed. The car that held the previous record was a \$4000 six cylinder car; but the Reo beat it by nearly five days.

See one; have a ride in one, before you buy another. If you dont you will be sorry for it.

We have plenty more proof of the solid motoring qualities of the Reo, if you want it; but this is absolute.

Send for catalogue and "Reo and the Farmer". Plain facts.
