Hugging a "Lamb."-Parson Johnson had been caught hugging one of the finest "ewe" lambs of the congregation who happened to be a very popular young lady and it created quite a stir in the church. So "Brudder Johnson" was brought for trial. "You have seen for him, John?" she asked. "A hun-dred dollars," replied John. "O! I'm so glad," said the wife. "Now we can buy us a cow, and I can get a new silk dress and...." "I didn't get it all in money," said John. "Well. what?" she asked. "Oh! ### POINTERS FOR MOTORIST.

### The Importance of Repairing Small Cuts in Envelopes.

To secure the best possible service from his tires, the motorist must care for them properly and nothing is of greater importance than prompt repairing of small cuts in the treads.

It is impossible to avoid these cuts as small stones and other sharp objects are bound to come in contact with the tread. Sometimes these cuts are small and seem insignificant but damage results from neglecting them. Miss Lizzie Rosenhoover, is now at the home of her parents, at Spring In fact, unless repaired promptly they will eventually bring about the com-plete destruction of the envelope. Stones, dust and dirt work in and un-der the tread, raising blisters and separating the rubber from the canvas. Moisture also gets in and quickly rots the fabric and disintegration follows.

Immediately on discovery of cuts the edges and interior should be thorough-ly cleaned with gasoline, separating the edges with a match or small stick to expose the inside. All foreign mat-ter must be removed and when the cut is perfectly clean, the interior and edges should be coated with cement. After allowing the first coat to dry, apply another and while still "tacky" knead with the fingers sufficient mastic and force it into the cuts, pressing it firmly into every crevice. When the cut is properly filled, hold the edges together firmly for a few moments until the mastic sets. The repair should then be allowed to stand six hours or more if possible, allowing the mastic to harden properly. Mastic is a plastic cement sold at nearly all garages. It is very useful and a small can for the tool box is a good investment.

from one person to another. In the first place, they should not buy candy. fruit or other food which is left in front of stores or anywhere else where the stores or any the stores or any the stores of the stores or any the stores of the stores flies may feed and walk on it. Flies pus. lay their eggs chiefly in stable manure, and if this is left without screens or other covers will be hatched in every stable. If you know of stores where food is not covered from flies, or of stables that have swarms of them around, write to the board of health about them, and the board of health will make the store keepers or stablemen obey its rules. But before you report other people of being careless and dirty and so making it possible for flies to become a nuisance, be sure that your own house is clean, and that no garbage cans or boxes are left uncovered to attract flies.

If you and all the people you know will follow this advice, there will not be nearly so many flies to plague you in hot weather, and there will not be nearly so much sickness and death especially among children, as now.

A Hen Spreads Wings Over Her Foster Children. The Mifflinburg Telegraph is responsible for the following unique tale

Freaks of nature are observable from day to day in this evoluting world of ours-double-tailed animals, three legged chickens, etc., etc. Fifty years ago it was ours to see a freckled-fac-ed, almost white negro in Old Virginia with most pronounced African tures, hair wooley-like, but red-a case miscegenation in bold relief-a

mixup without mistake. And now right here in Mifflinburg it is ours to record a rather strange proceeding among the "lower creation," to wit Mr. Chas. Stahl. residing on Thomp son street, recently located a clucking hen on a goodly setting of eggs. A few days thereafter a cat close by gave birth to a number of kittens, and when the mother cat was temporarily absent

from her young, the old hen quit her eggs and spread her motherly wings over the kittens, and ever since then these kittens follow the hen and when the mother cat appears there is a fight between the real and the foster mother. Its a sight to see, especially the persistency of that hen to coddle the kits and neglect her eggs. Maybe there is a moral in this very singular demonstration of love and affection. Study and see, for if this you do you might be persuaded to clip the wings

of that deserting cluck, chase her eggs into an incubator and-drown the cats and their clawing ma-ma! **Bucknell Commencement Music.**
