FACT, FUN AND FANCY.

Bright, Sparkling Paragraphs-Selected and Original.

Under the spreading chestnut tree a stubborn auto stands,

And Smith, an angry man is he, with trouble on his hands. He cusses softly to himself and crawls beneath the car,

And wonders why it didn't burst before he got so far.

The carbureter seems to be the cause of all his woe; He tightens half a dozen bolts, but still it doesn't go.

And then he tries the steering gear, but finds no trouble there-Till, wet with perspiration, then he quits in sheer despair.

He squats beside the road to give his brain a chance to cool, And ponders on his training at the correspondence school; And then he starts the job once more,

until by chance 'tis seen The cause of all his trouble is—he's out of gasoline.

Silence may be golden, or it may indicate guilt.

he is angry.

Many a fast young man comes home on the slow freight.

a close-fisted enemy. It's easy for people to make money who don't need it.

school of matrimony. Many a man succeeds because he's of his life. a good guesser.

say about other people.

The most serviceable knowledge is not acquired from books. The first frost is a great reminder

of a wasted summer wage. Experience is a dear school, the matriculation fee is easy.

The love that is purchased money is not worth the price. One thing is certain that a henpeck-

ed man never blows about it. No man would bet unless he had some hope of bettering himself.

Unfortunately, a tombstone inscription isn't a passport to heaven.

A great deal of the luck some men have is founded on hard work. People who say just what they think True Isn't It.

are more numerous than popular.

Co., June 5, 1911, tract of land n volved in the locomotion of certain in-sects, rather than that of birds, and Elmer C. Ross et a with passengers, speeding at a rate of Lemont,: \$800. 100 miles an hour, will be the general means of travel.

There is a word of cheer in Mr. Rush Twp.; \$1. Edison's prediction when he says:

"The earth, however, will not cease to be busy in consequence. There will be lots of things running up and down all the time; but the days of steam married the daughter of a man who not state which spot he prefers, it is made a great fortune out of the man-known to be in the vicinity of Belleufacture of farming machinery. He fonte, never would have made it had he lived

The coming farmer will push a button and work levers. Storage bat-teries will drive plows, while the future agricultural laborer will be a man who has acquired a working knowledge of chemistry and botany. The very utmost will be got out of the earth and seed within the earth; but all the manual work—the donkey work with the sweat of the brow-will be performed by machinery controlled by

"We are only at the beginning of science," said Mr. Edison, throwing away half a cigar and lighting a piloted warden Frances over Potter fresh one. "Nature's doors are just township to view the farms, and from opening after mighty pushing on our part. This century will see as many was favorably impressed with the lay hair-raising wonders as the past has of the land named above. been. When good Queen Victoria was a girl where was steam, where was electricity? They both appear to be a matter of course to us now. Perhaps some wizard, as they call me, fore- cian, went out to see how the bees shadowed it all to them in those days. They have always been men who think; but even thinking must go slow of this meeting, he pulled out more patiently overcoming ridicule and the hundred and one obstacles which al-

be achieved. Mr. Edison not only puts the old-fashioned, long-whiskered alchemist, with his wand and alemble, out of business, but he puts a holy crimp in the arguments of the single gold standard men. Let us hope that mistaken is Edison may take a few more vaca- his apiary.

recent graduate of the Dickinson Seminary at Williamsport, has been selected by District Superintendent cock as pastor of the M. E. church on the Centre and Sandy Ridge charge. Rev. Hodgins entered upon his field of labor last week.

James C. Rice, an employe at The Pennsylvania State College, fell a disalance toppled to the ground, fortunately landing on his feet. A few bruises on his knees and a bad scare were his only causes for suffering.

C. H. Bradford, the Lamar cattle dealer, is finding Centre county a good market for his high grade cows. Rechoice Holsteins and Guernseys to Nittany Valley farmers, at good prices, and a week or two ago sold four cows of various breeds to a man living in the vicinity of Bellefonte for \$380, an average of \$95 each.

Samuel Ulrich, who occupies the T. B. Motz farm in Gregg township, while catching young pigs one day last week, was pursued by an old sow that caught him by the seat of his breeches. Sam struggled manfully to get loose and finally succeeded, and escaped from the furious animal, and now they say Sam wears an article of clothing especially adapted to young children-Millheim Journal.

The services of the Hagen carpenthe proposed institution will care for ter crew appear to be constantly in all the criminals now incarcerated in demand. Having finished up their work in Centre Hall, which occupied large portion of the summer, they have gone to Rote to build porches for William Gentzell and Robert Auman, and will also make some improvements for Simon Rote at Rote's mill Later the crew will be employed at the Spicher farm, below Pleasant Gap, where a number of outbuildings will be erected.

Henry Kling, who resides near Coburn is anxiously trying to locate his daughter, Miss Nora Kling, who disand by whom nothing has been heard up to this time. Prior to her disapnmate of the Danville asylum, but was sent home as her mental condition had improved. At the leaving she left a note stating she was going to be married. Any person knowing where she is located should communicate with her father.

The condition of Mr. Abe Loose, of Centre Hall, is still precarious. Some weeks ago, as he was in the mountain

HOW TO USE AMMONIA.

Many Ways In Which It Proves Helpful In the Household.

In housekeeping ammonia has many uses. It is an efficient help about the wardrobe. Black material sponged with a cupful of water in which a teaspoonful of ammonia has been mixed will renew its freshness, while black silk will lose its objectionable shininess by such a sponging. A little ammonia will remove grease from coliars and when rubbed over corsets will cleanse them to a nicety.

When mixed with equal parts of turpentine ammonia will remove paint stains from cloth. If the paint be stubborn it may require several applications before the work is done. Persevere. Nothing is so good for boys' tweed suits as to sponge them with the ammonia mixture. For toilet use a small quantity will soften the water in which the bair is washed and aid in cleansing the scaip.

It renders the bath delightful, and carpets when, thoroughly gone over with ammonia and water are surprisingly restored to something like their original freshness. When mixed with white wax and turpentine it makes the best of polishes for the floor. To relieve the pain and prevent inflammation resulting from the bites and stings of summer insects ammonia ranks first as a cure.

How to Serve Watermelons.

Watermelon balls served with sherry and ice in tall grapefruit glasses make a pretty and tempting luncheon course on a hot day. Another way of making termelon even more delicious than

by nature is to tap it and pour in t bottle of champagne or of ling burgundy. The melon should on the ice until thoroughly cold. and in the meantime the wine will soak into the fruit, making a delicious

A pretty way to serve the fruit for breakfast is in four or five inch squares with a hollow on top filled with shaved ice. It can also be cut in strips and laid in a square around a mound of

How to Use Cold Coffee.

If you have a cupful of strong coffee left from breakfast prepare it with sugar and milk to taste. Put into a bowl one cupful of white flour, one cupful of whole wheat flour, one-half tenspoonful of salt and three level teaspoonfuls of baking powder. Beat one egg lightly, add to the coffee and stir into dry mixture. If it should be too stiff add a little more milk or water. It should be more like a stiff drop batter than dough and not thin enough to pour. Bake in hot buttered muttin pan twenty minutes.

How to Remove Rain Stain.

To take out rain marks iron the cloth on the right side with a moderaftery hot iron, placing a clean damp cloth between the material and the iron. The cloth must be kept damp in order to be a success. Treated in this way the rain marks will not only disappear, but the cloth will not spot

How to Use Cheese Scraps. Do not throw away the scraps of theese left in the pantry, even though dried and seemingly useless. Grate them and sprinkle over a dish of creamed potatoes, to be set into a hot even till a delicate brown, or serve with the dish of macaroni and tomato

How to Wash Jerseys.

Do you know that a band of washing silk or soft linen the size of the waist sewed inside a knitted golf jersey before it is washed will prevent it from stretching and keep it in perfect shape?

Edison's Auto Kills a Child.

At Lauf, six miles from Nuremburg.

Thomas A. Edison, the American inventor, ran over with his automobile and instantly killed a child tweive years of age, who was playing in the road when the inventor and his motoring party came by.

No carelessness on the part of Edison's Chauffeur caused the child's death. It is believed that Edison will be allowed to proceed on his way immediately after the hearing.

Missaken identity, which happened in his aplary.
