UNIFORM SYSTEM OF WEIGHTS & MEASURES

TO BE ENFORCED THROUGHOUT PENNSYLVANIA.

WILL CHECK A COMMON ABUSE

Act of Assembly Provides an Officer for Each City and County-Protection to Customers-Counties Are Slow to Act-Legal Standards.

Owing to lack of the general official inspection of weights and measures in this state, the question of weighing and measuring of commodi-ties has not been prominently brought to the attention of the public. As a result, the practice of defrauding the customer through giving short weight and measure has very largely contributed to the high cost of living. The act creating the bureau

of standards, equipping it with official standards verified by the federal bu-reau of standards, is a step in the right direction. But it avails little if county inspectors are not appointed and paid as provided by law.

have been paying for Consumers years for things they have not got owing to faulty or defective scales and measures, because of lack of legislation. The act of 1911 conferring on county commissioners and mayors of cities the power to appoint inspectors provides a remedy for many of the evils.

Research Bureau's Findings.

The bureau of research of Philadelphia in its investigation covering a period of several months in which tests were made of 500 different commodifies sold by representative deal-ers found that 17 per cent. of these were short in weight or measure. A few cases show the necessity of the vigilance of the consumer when making purchases, in order that he or she may get the quantity which has been paid for.

Out of 225 weight tests of grocerhes, 158 showed an average shortage of 70 per cent.

Out of 50 measure tests of grocer-46 showed a shortage of 13 per les, cent. on the total purchase. Of twenty tests of meats and pro-

visions at the two markets owned by the city, 12 showed shortage and with two exceptions, these shortages were high-priced commodities, the greatest shortage being 14 per cent.

The sealer in Harrisburg condemned 360 half-peck and quarter-peck measures below the allotted standard in one year. Estimating that they were used on an average of six times at each market, the number of markets being held on each day, and assum-ing the commodity sold to be potatoes, at an average price of 75 cents a bushel, the loss of 1880 bushels of pota-toes would be \$1410.

The probability is they were used measuring various commodities sold, which prevents a correct estimate of the actual loss sustained by consumers in Harrisburg, but the figures are near enough to give an idea of the loss,

Purchasers Lose 3 Per Cent. Weights tested during the same perwhich were in daily use by Harrisburg dealers, showed a deficiency which produced a loss of 3 per cent, to the purchasers of weighed commodities

Under the act of 1911, the inspector is empowered to inspect, test, try and ascertain if they are correct all weights and measures, and may enter on any premises or stop any deal-

Penalty for short weight or measure is, for the first offense, a fine of \$60; second offense, fine of \$200, and sub-sequent offense, \$100 fine and imprisonment of not less than thirty days or more than 100 days.

Some county commissioners are not taking the new law very seriously. An upstate county is offering the job to any one who wants it at \$18 a month, but so far there have been no applicants. What the compensation should be is a matter apparently for the commissioners and mayors to fix. but it ought to be sufficient at least to reward a man of the necessary capacity to carry it out.

Few acts passed by the last legislature would benefit so large a num-ber of people as this one. Unless the appointive powers act, the bureau will be merely an ornament

Tyrone Postoffice Does Big Business. The receipts at the Tyrone postof-fice for the year 1911, from the sale of postage stamps, postal cards, (not including any money order bus-iness) were \$\$3,591.79. The expenditures for the year, chargeable to the office, were \$25,520.61, showing a prof-it of \$58,071.18 to the government.

The Wilson Chemical Company is a prominent factor in obtaining the showing. This company's postage bill for last year was about \$63,000, or an average of more than \$1,200 a week. In 1911 there were 12,046 money orders issued, amounting to \$121,348.-41, and there were \$8,280 money orders received and paid, amounting to \$230,944.19. With the fees, drafts, transfers, etc., added to the orders is-sued and paid, the money order busi-ness alone amounts to nearly a half

million dollars in a year. The receipts at the Tyrone post-office for the last three months of 1911, were \$27,522.90, or at the rate of \$110,091.60 a year, actually more than the total receipts at Altoona last year.

Another Condensary. A new industry is scheduled for regarding this act was made. The of-ficials informed us that so many oth-er things were demanding their at-tention that the provisions of this act had not been discussed by them. As An Entertainment.
