Cherries and apples promise well in this region.

Farmers are still planting corn and potatoes. It is not too late. For example, there is Doc, Wellersham, of New Berlin, who has a farm on the hill north of the college of our boyhood and who never plants his corn or potatoes before July 1st. He has both when other farmers have none.

Clarence Long is nearly ready for his summer guests.

The woods are redolent with honey-suckles sweet which vie with the pink on the cheeks of the maidens who seek the kind of apple which "Gran" says "Eve handed to Adam." There is an apocryphal record which says that when Eve handed the apple to Adam, he handed it back politely saying: "You first take a bite my darling." And then the woman spoke thus: "I don't care, A-dam if I do."

This is said to account for the proneness of the women to this day to say "darn it."

Every man should be a master of his art instead of a mere smatterer. In the good old days it took seven years for a man to learn a trade. Now, when a fellow works a year under a master mechanic as a carpenter or blacksmith, he imagines he "knows more than the boss." Such fellows are mighty big bunglers and their whole life is botched up.

## WINGATE.

A Birthday Party.—On last Tuesday morning when the morning passenger train that is due at Snow Shoe Junction, at 9:18 a. m. arrived, there was certainly a bunch of curious people in that hamlet, and I bet that they thought themselves down on Broadway street when the total number of passengers had descended from the train, which on an average would reach a half hundred. After getting a line up they marched up to the home of Eli Stere where they spent the day, and the scribe learned later that it was a reunion in honor of Mr. Stere's birthday. Mr. Stere was born in the vicinity of Dix Run and has lived in that neighborhood up to late years, when he moved to the Boggs township almshouse, located at Snow Shoe Junction. Here he has been for the past eight years and up to this age he has been a great helper to this community and its welfare and a great church worker. In his younger days he was a hard working man and at that time he realized what the word "economy" meant, and during his past experience he is able to furnish valuable information to the younger men and women who are growing up and never went through the experience that Mr. Stere has. Mr. Stere has at home the following children to enlighten his heart in his older days: Cyrus, who assists him on the farm, and one daughter, Dora, who assists her mother in the housework. On the twenty-first day of May the following relatives were present: Anna Hunter; Katie Stere, of Patton; Phebe Stone, of Blue Ball; Patience Stere and children, Howard and Mary; Harriet Ingram and children, Mary, Frank and Anna; Lizzie Stere and children; Ole Stere and children, of Dix Run, Anna Stere and daughters, Reula, Holt, Ella Holt, Orle Holt, Mary Holt, and Margaret Hoover; Hassel and Beatrice Stere; Sarah Peters and Irvin Holt, of Unionville; Mrs. Mary Winters, of Rochester, N. Y.; Mr. and Mrs. Clyde Wells and son Harry, of Nanty Glo; Mrs. Beatrice Lutzler and family; Mr. and Mrs. Temple and son Walter, of Lumber City, Pa.; Mrs. E. F. Johnson and daughter Emma, and George Stere and son Fred, of Altoona; Mr. and Mrs. S. S. Saxton and son David, of Bellefonte; and Julia Smith and children, of Patton. Also there were many present who were close friends of Mr. Stere which ran the total number present up to sixty-four present. At noon there was one of the most delicious dinners prepared and served that could possibly be gotten up. Nothing was spared to make this one of the greatest events that ever took place in this valley for a number of years back, and nearly every one remembered Mr. Stere with a valuable present of some kind. It would take too much room to specify the articles. In the evening some boarded the five o'clock train and departed for their homes while others remained over night. Mr. Stere says that was one of the most enjoyable days that he ever spent in his life, and wishes to extend his utmost and sincere thanks to his many relatives and friends for their glad remembrance of his fifty seventh birthday and invites them all back to visit him again.

Peaches, pears, plums, apples and cherries look to be a promising crop.

Many people ask the scribe why he does not report every week. I answer this, simply because the news is too scarce.

Some insurance was held on the furniture; the house was insured also.

Last week G. E. Campbell erected a high pole in his corn field to which he lashed a big black "Jim crow." Now what is the significance of this act; does it mean all at rest, or that he will kill the rest? However the crows seem to observe the proper solution as they circled when they see their comrade hanging with his toes skyward.

Albert V. Miller unloaded and delivered a car load of coal to his patrons on last Saturday. Owing to the fact that the price of coal soared away up in the tree-top during the latter part of last winter, our dealers did not order the usual amount of coal that it takes to supply our people. The cry of the people at present is: Coal! Coal! and as the price has moderated somewhat since the warm weather set in, Mr. Miller considered the matter wisely and for the benefit of the people ordered a car. Can't do without it, Albert.

I think it would be better for some of the Tusseyville boys to learn a little more sense than what they have; they would better stay at Tusseyville and mind their own business instead of running after the girls and carrying on the way they did and coming home from prayer meeting at that; if they don't watch out they might pay for their fun.

John Ishler spent Sunday at the home of Edward Bubb.

## A Drop of Blood

Or a little water from the human system when thoroughly tested by the chief chemist at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., tells the story of "poorish blood—nervous exhaustion or some kidney trouble. Such examinations are made without cost and is only a small part of the work of the staff of physicians and surgeons under the direction of Dr. R. V. Pierce giving the best medical advice possible without cost to those who wish to write and make a full statement of symptoms. An imitation of nature's method of restoring waste of tissue and impoverishment of the blood and nervous force is used when you take an alternative and glyceric extract of roots, without the use of alcohol, such as

## Dr. Pierce's Golden Medical Discovery

Which makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgment. Get what you ask for!

## Causes of Appendicitis.

The question has again been raised in medical journals as to whether the increase in the frequency of appendicitis in recent years may not be due to minute particles of iron. The old millstones that ground so slowly and ground small enough in the old days have passed away, and it is suspected that these particles of iron come from the rollers now used in grinding wheat. Some medical authorities suggest that these particles find their

way into the appendix where they form the nucleus of a concretion. Cases are cited where bullets and shot have met with having come as a kind of a surgical dessert to the eating of game; also bunches of bristles from a too vigorous use of the toothbrush.—Grit.

One of the reasons why most girls want to marry is because they don't know what they want.
