Miss Dora Scholl, who is a trained nurse at Huntsville, Alabama, concluded that the best way in the world for one to keep posted on Centre County news, was to take the Centre Democrat and suiting the action to the word she dropped a big silver wheel into the coffers of that paper through the medium of the "Middle man" and now I am sure she will watch with pleasure the weekly visits of the Centre Democrat.

No Amendments to Be Voted Upon.

Considerable misconception appears to be prevalent throughout the state about the constitutional amendments which are now being advertised and the office of the secretary of the commonwealth is receiving numerous letters from county officials asking for some information about the manner in which the amendments will appear on the ballot.

"There are no amendments to be voted for by the people this fall," said Chief Clerk Geo. K. Thorn of the department in speech about the amendments. "People seem to have the impression that, because they are advertised, they must be voted on. These amendments are being advertised under requirements of the constitution which says that amendments must be voted upon twice in the legislature before being submitted. Some of the amendments are now being advertised for the second time and some for the first time."

"Now if those which come up before the Legislature for the second time are passed they will be submitted to the voters at such time as may be designated. Take the \$50,000,000 road bond issue, for instance. It was passed in the session of 1911. Now it is being advertised to or prior the election for members of the sessions of 1913. If it passes next winter it will be voted upon."

"I don't know how this popular misconception of the matter came about, but it is making us lots of work answering letters."

Nineteen Persons Stricken Blind.

A news item from Anderson, Ind., relates of nineteen persons having been stricken blind as a result of gazing at a light caused by workmen welding with an electrical process on a trolley wire on Sunday. Blindness did not strike some who saw the light until several hours later. An eye specialist who was consulted by a number of the victims, gave his theory that the peculiar rays of light given out by the welding process caused the quick development of bacteria, already lodged in the eye, and blindness resulted.
