VICE PRESIDENT SHERMAN DEAD

Twenty-Five Years. After a long illness, Vice President of the United States James Schoolcraft Sherman died at his home in Utica, N. Y., at 9.42 o'clock Wednesday night, October 30th. He died in a uremic coma as a result of Bright's \$700. lisease, heart disease and arteris-

clerosis. Mr. Sherman's rapid decline in health dates from August 21, when he was formally notified of his nomination as vice president, according to is physician. He was warned that the exertion incident to the ceremonies might have an ill effect, but insisted least thinks it needs a tariff wall as that the program as arranged be carried out.

" You may know all about medicine," Mr. Sherman told his physician when he urged him to arrange for a brief informal notification, "but you don't know about politics." Two days later the exertion of notification day began to tell on the patient, and he from that

THE INQUISITIVE MAN.

His Curiosity Was Eased, Though His Feelings Were Mangled.

A business man in Boston said to a reporter: "A few days before an election a little incident happened which this way: You see, I had some business to transact with one of the candidates for the legislature, and, as it was something important, I was forced to go out to his house to see him. I guess he had gone to bed. At any rate, the servant who opened the door showed me into the parlor to wait for his master. I was obliged to wait some time, and while doing this I amused myself looking at the pictures

and other ornaments about the room. "On the center table, among books and other bric-a-brac, stood a big fancy decanter filled with liquor which looked like whisky. It was a curious looking decanter, and on one side was some fancy lettering which I could not out what it said, I lifted the decanter up from the table and tipped it up so that the light fell on the lettering. It said, 'If you touch me I'll tell.'

"Curious, wasn't it? But, sure enough, it did tell, for I had scarcely had time to read the lettering when my ears were greeted with the tones of 'Johnny Get Your Gun.' There was a music box hidden in the bottom of the decanter, and when it was tipped the machinery started and the music began. You can judge for yourself how surprised and chagrined I was, for I had never seen the master of the house before and he would have a fine opin-

lon of me for my meddling qualities. "Right in the middle of the tune he walked into the parlor and gave me a curious smile when he heard that music box. It seemed as if it would never stop. I tried to make some sort of apology, but made a bull of it, I know. though now I can not think for the life of me what I said. He saw how confused I was and laughed it off, saying that it was an oddity he had found in New York."

Careless.

The story is told that a letter received some years ago by the Westinghouse Machine company said that the writer had been using one of its standard vertical engines with eminent satin continuous service night and day, handling its load without a hint of trouble, but that "upon shutting it down the other evening it went all to pieces." The letter was passed to the eminent inventor whose name the company bears, who handed it back with the remark, "Ask the blame fool what he shut it down for."-Power.

Bun Williams lives on a farm between Martha and Port Matilda. H had a fine young colt that he had just about broken for work and it was valued at \$250. Last Friday the animal was out in the pasture close to the woods. That day there was a great deal of hunting in the mountains along the Bald Eagle and considerable shooting was heard all through the valley, which is customary on the opening of the hunting

On Saturday they went out to the field to get the colt, and were surprised to find the animal dead in the this line and many others are folpasture.
