The ice harvesters of the town are beginning to get rather anxious to know if there will be any ice. The reconciliation that one gives them is to apply to Mr. Bliss the weatherman and kindly ask if he has ice on the program or not. We cannot only put the anxiousness in the ice harvesters but the ice skaters as well as they also like to see the ice to make good the sport.

FROM CANADA.

It may be news to you and the readers of the Democrat to hear something from Canada. The United States had great prosperity the last century, but I believe the prosperity in Canada is coming this century. Here at Petrolia is Canada's largest oil region, but it is dying out and the people are turning to agriculture, and we have one of the richest sections in fertility that I have ever been through, and at a price a man can afford to buy. You can purchase farms with the best of buildings for \$50 per acre. There was a farm offered me last spring of 200 acres, buildings on that would cost \$5000 with \$3500 standing timber on for \$10,000. That gives you an idea of the value of land today, but the American farmers are coming across and taking these opportunities every day.

I have general charge of the largest cannery in Canada. I came here last April. I packed 5000 cans rhubarb, 240,000 cans strawberries, 560,000 cans of peas, 300,000 cans of tomatoes, 290,000 cans of corn, 100,000 cans of pumpkin, 75,000 cans of apples, succotash, carrots, parsnips, spinach, beets, other fruits about 75,000 cans and we will have a pack of pork and beans this month to make of 200,000 cans. We employ 300 hands in rush of season.

Next year we will have a much larger pack for we are doubling our acreage 100 per cent. The growing of canning crop is profitable to the farmer for they clear from \$30 to \$50 per acre, after all expenses are paid.

Living expenses run about the same as over in the States. Pork is worth 10 cents a pound dressed, fat cattle \$6.80 on foot, potatoes 90c per bushel, apples you cannot give away at any price.

We have electric light, natural gas, paved streets, good stores, good schools, good churches and large congregations so you can see we have about all we need to be contented. One thing we don't have and that is the mountains and hills of Old Penns Valley, for the country is level for miles. Kind regards to my friends, Very truly yours, EDWIN K. SMITH.

After any Sickness

nothing so rapidly restores health and vigor as SCOTT'S EMULSION. It is the essence of natural body-nourishment, so medically perfect that nature immediately appropriates and distributes it to every organ, every tissue—feeding, nourishing and restoring them to normal activity.

SCOTT'S EMULSION is not a patent medicine, but is nature's body-nourishment with curative, upbuilding properties and without a drop of drug or alcohol. It contains superior cod liver oil, the hypophosphites of lime and soda with glycerine, and is so delicately unadulterated that it enters the system without digestive effort—builds, tones and sustains.

After croup, whooping cough, measles and other child ailments it is nature's ally in restoring health.

After grippe or pneumonia it imparts strength and health, and for colds, coughs, sore, tight chests and throat troubles SCOTT'S EMULSION gives the greatest relief known.

Make a plain syrup by mixing one pint of granulated sugar and 1/2 pint of warm water and stir for two minutes. Put 2 1/2 ounces of pure Pinex (fifty cents worth) in a pint bottle, and fill it up with the Sugar Syrup. This gives you a family supply of the best cough syrup at a saving of \$2. It never spoils. Take a teaspoonful every one, two or three hours.

The effectiveness of this simple remedy is surprising. It seems to take hold instantly, and will usually stop the most obstinate cough in 24 hours. It tones up the jaded appetite and is just laxative enough to be helpful in a cough, and has a pleasing taste. Also excellent for bronchial trouble, throat tickle, sore lungs and asthma, and an unequalled remedy for whooping cough and croup.

This recipe for making cough remedy with Pinex and Sugar Syrup (or strained honey) is a prime favorite in thousands of homes in the United States and Canada. The plan has been imitated, though never successfully. If you try it, use only genuine Pinex, which is the most valuable concentrated component of Norway white pine extract, and is rich in guaiacol and all the natural healing pine elements. Other preparations will not work in this recipe.

A guaranty of absolute satisfaction, or money promptly refunded, goes with this recipe. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

Protection from "Sharks."

At a meeting of the Chamber of Commerce at Clearfield, President James P. O'Laughlin advised the business men that hereafter when they are solicited to invest their money in out-of-town get-rich-quick concerns or, in fact, foreign investments of any kind, that they refer their offers or propositions to the Chamber of Commerce with a request in writing for an investigation. In this way it is believed much money will be saved that might otherwise get to the "sharks."
