

WRAP DRAPERY.

A Peculiar Effect Obtained In This Model.

PARIS INDORESSES NEW COAT.

It is hard to tell whether the wearer of this wrap is "coming or going," for the front panel seems to merge into a train. The wrap really winds about the figure in a very graceful way when it wears moves.

ALWAYS LATE GIRL.

She's the Dropped Stitch In the Social Fabric.

Why is it that so few girls can be on time? Is it that they have no respect for the clock or no real conception of the value of time?

The girl who is always late, who arrives ten, fifteen or perhaps thirty minutes after the appointed hour, who keeps people waiting, with a sublime indifference to their discomfort, is a nuisance and a bore. She is the dropped stitch in the social fabric. Some one is always trying to fill up the hole made by her tardy arrival.

Are you one of the girls who never can be on time? No doubt you think you make up for your tardiness and the trouble you cause by your apologies and your smiles. Perhaps you can make yourself believe that the abused ones who have waited forget their nervousness and impatience and anger as soon as you do. But they do not.

The hostess who has shivered and burned while her dinner reversed the process does not forget. She has been in purgatory even if it does look like her own parlor. She has had to say pleasant things while she thought the opposite.

That ghastly expectancy that pervaded her guests had to be diffused by her own calm assumption of perfect pose and facile gaiety. She gets a nervous headache as she pictures the wreck of her menu. You spoil the affair for her even if the cook manages to save the dinner. No; no one forgets you after you have made such indelible impressions on them.

What Women Are Doing.

Dr. Mary Mills Patrick, president of the American College For Girls, in Constantinople, is a native of Canterbury, N. H., and received her education in two Iowa colleges. In 1899 she was graduated by Lyons college with an A. M. degree, and in 1890 she took a special course in the State university of Iowa, after which she went abroad to take charge of the Constantinople institution. Since then she has taken special courses at the universities of Heidelberg, Zurich, Leipzig, Berlin and Bern.

The College For Girls has been chosen by the Turkish government for the training of government students. There are at present more than 200 students, thirty of whom are Turkish girls. Two young Turkish women, Halide Hanoum and Gullistan Hanoum, both graduates of the College For Girls, have distinguished themselves, the first as a writer, the second by her work for the Young Turk party.

Mrs. A. Calvert Bourgeois is said to be the only woman who stumped the country for Woodrow Wilson. She was born in Missouri, received her early education in the public schools and was graduated from the Massachusetts Law school. She is in active practice in her profession, making a specialty of real estate and probate matters. She is thought to be the only woman public speaker and Chautauqua lecturer who is not a member of any club or suffrage organization. Though eligible to many, she prefers to remain independent.

Table Decoration.

Flowers and fruit mixed make a beautiful decoration for the dinner table. Put a glass tray with a deep border in the center of the table and fill it with oranges, lemons and bay leaves. In the center of the tray stand a glass vase and in this place white, orange and pale yellow flowers. Let green foliage hang down the sides of the vase.

Emptied the Hall.
Ben Butler was once chairman of a meeting at which Rufus Choate was booked for an address. Mr. Choate was about to begin his address when a man crawled up to Butler and whispered to him that the joists in the floor and the supporting beams were giving way because of the heavy pressure on the floor and they were likely to collapse any moment. Butler turned to the man and whispered to him, "Keep quiet." Then, turning to the audience, he said: "A man has brought me information that outside of this hall there are not less than 20,000 people clamoring for admission. I propose to adjourn this meeting to the common, where all can hear Mr. Choate. Now, just see how quickly we can empty this hall." Meanwhile Choate was tugging at Butler's coat-tails, saying: "Ben, don't! Stop, Ben! Why, I can't see to read on the common. My voice won't carry in the open air. I can't make them hear," and so on. After most of the audience had left Butler turned around to Choate and said, "Say, Choate, would you rather deliver this speech here in this hall or down below?"—Argonaut.

Music and the Hair.
Though 11 per cent of all musicians are bald, it appears that this is the result of exposure to the wrong musical vibrations. M. Henri de Parville, the French physicist, is credited with the theory that the well known action of music on the nervous system affects the nutrition of the bodily tissues and thus has an influence on the hair, and it is claimed that observations support this view. The influence, however, is not always the same. All male pianists have a wealth of hair, and it is found that playing the piano and violin have a specially beneficial effect, as do also, in less degree, the violoncello, the harp and the double bass. Players of the flute and clarinet get much less hair stimulation, their locks showing a very perceptible thinning by the age of fifty. The harm done is among players of brass instruments, and those who make much use of the cornet and the horn advance rapidly toward baldness, while players of the trombone lose at least 90 per cent of their hair in about five years.—Exchange.

Graphite.
Chemically graphite is a very interesting body and is known as one of the allotropic modifications of carbon. Carbon, like the magicians of old, has the power under proper conditions of assuming various forms called allotropic modifications without losing its individuality. So while its properties and appearance may have changed it is still chemically carbon and nothing but carbon. As ordinarily met with in the form of coke, coal and charcoal, it is called amorphous carbon, as graphite it is called graphitic carbon, and in the form of the diamond it is known as crystalline carbon. Coal is therefore very aptly termed "black diamonds," since chemically it is identical the same as the white diamond, though some change which has taken place in that infinitesimal particle called the molecule has caused its value to be rated in dollars per ton instead of dollars per carat.—Exchange.

Written Under Difficulties.
Chateaubriand's celebrated pamphlet of "Bonaparte and the Bourbons" was prepared under more than ordinary external circumstances. Though the gigantic despotism was tottering under the terrible blows dealt it in the Russian campaign, though the English had crossed the Pyrenees and the allies were marching upon Paris, within the walls of the city Napoleon and his police were still omnipotent. It was a dangerous occupation of the author. At night the manuscript was concealed beneath his pillow, and when he went abroad it was always carried upon the person of himself or his wife.

Two Views.
"How dismal ye look!" said a bucket to his companion as they were going to the well. "Ah," replied the other, "I was reflecting on the uselessness of our being filled, for, let us go away ever so full, we come back empty!" "Dear me, how strange to look at it that way!" said the first bucket. "I think, however empty we come back we go away full!"—Ladies' Home Journal.

Whiz!
The fat man puffed up to the window of the ticket office. He looked at the clock and saw that it was 2:31. "Have I time to catch the 2:30 train?" he gasped. "You have time," smiled the ticket agent. "But I don't think you have the speed."—Cincinnati Enquirer.

The Aeroplane Age.
"What's become of Yorick Hamm?" asked Susan Brett. "I hear he's stranded on Saturn," answered Hamlet Patt. "He went out with a planet storming crowd, the show busted, and he's never been able to get back."—Kansas City Journal.

Sympathy.
Hobo—I haven't touched a thing to eat for three days. Lady—You should see a doctor and get him to prescribe something for your appetite.—New Orleans Times-Democrat.

A Teacher's Slip.
Teacher (to pupil)—What are you laughing at? Not at me? Pupil—Oh, no, sir! Teacher—Then what else is there in the room to laugh at?—Exchange.

BIRTHDAY PARTY
Veteran Peter Haines at Pine Glenn Arrived at 71st. Mile Post.
A delightful surprise party was held at the home of Mr. and Mrs. Peter Haines of Pine Glenn on June the tenth, when Mr. Haines celebrated his seventy first birthday. Mr. Haines is a well known veteran of the late Civil war and gained the admiration and respect of all who are acquainted with him, for his every day life is a model example for all us christians to follow. It was indeed a delightful surprise for him, for he was not aware of this being his birthday until he was ushered into the dining room before a table beautifully laden with good things which Mrs. Haines alone knows how to prepare.
The following were present, Mrs. R. Watson and daughter, Mrs. David Mulholland and family, Miss Emma Midiam, and her son-in-law Mr. Bandy and family from Clearfield and their grandson Mr. Dale also from Clearfield. He received many beautiful presents and postal cards from his various friends.
After the feast and a pleasant evening spent in social enjoyment the guests took leave, bidding the veteran many more happy birthday festivities.

Most Children Have Worms.
Many mothers think their children are suffering from indigestion, headache, nervousness, weakness, costiveness, when they are victims of that most common of all children's ailments—worms. Feeble, ill-tempered, fretful children, who toss and grind their teeth, with bad breath and colicky pains, have all the symptoms of having worms, and should be given Kickapoo Worm Killer, a pleasant candy lozenge, which expels worms, regulates the bowels, tones up the system and makes children well and happy. Kickapoo Worm Killer is guaranteed. All druggists, or by mail, Price 25c. Kickapoo Indian Medicine Co., Philadelphia and St. Louis.—Adv. June.

The late Samuel Frank, of Rebersburg, in his will made an equitable distribution of his estate among his heirs.
The Centre Democrat is \$1 a year when paid in advance.

ANTY DRUDGE

Mrs. Housewife—"Here I've boiled and rubbed this lace and the coffee stains are in it yet. I'm simply afraid to do a thing more to it. It looks weak already. I guess it's a goner."

Anty Drudge—"Not if you will take my advice. Take that boiler off the range, fill it with cool water, rub the lace with Fels-Naptha Soap and soak it a short time. Then rub it lightly and rinse it. The stains will be all gone and the lace'll look as good as new."

"Boil until tender" is what all the cook books say.

Boiling makes most anything tender, even hard wood.

And that's precisely what boiling does to your clothes. Fels-Naptha Soap dissolves and loosens dirt in cool or lukewarm water, without hard rubbing.

It's the easy way of washing; makes the clothes cleaner, whiter and purer, and they wear twice as long.

Be sure to get the genuine Fels-Naptha and follow directions on the red and green wrapper.
